NEW BUILDING

THE BABIES HOSPITAL

SEVEN FACTS OF INTEREST

THE BABIES HOSPITAL for over forty years has been getting results in making babies better, and is still the only Hospital of its kind in New York City.

THE BABIES HOSPITAL has a Training School for Infants' Nurses, and has graduated 1,100 pupils. These nurses have helped the babies grow strong through careful feeding and the application of our doctrine of "Sunshine, Sleep, and Soap."

THE BABIES HOSPITAL offers facilities in its Out-Patient Department (now at the Vanderbilt Clinic, at the Medical Centre) for the treatment of poor babies, and has contributed its very large share to better health and happiness. 105,125 patients have been cared for here, with a total of 399,537 visits.

THE BABIES HOSPITAL operates a Summer Branch at Rumson, New Jersey, where much has been done for little children by fresh air, sunshine and kindness.

THE BABIES HOSPITAL has for twenty-six years provided lectures to the Fourth year students of the College of Physicians and Surgeons. Young physicians are here given unusual opportunities for practical study of difficult and unusual cases of disease in young children at first hand.

THE BABIES HOSPITAL has admitted 40,518 babies. It was a struggle for existence with most of them and skillful nursing has saved many.

THE BABIES HOSPITAL has a well organized Social Service Department so that visits are made to the homes of babies admitted to the Hospital, to look into conditions there and supply the help and instruction so often needed.

THE BABIES HOSPITAL

BABIES HOSPITAL PRESIDENT'S REPORT, 1928

The past year has been a most important one for the Babies Hospital and brought with it hard work and some changes.

The outstanding item of interest was the successful campaign for the necessary funds to build and equip our new hospital, which resulted in subscriptions totalling nearly \$1,750,000. The spirit of enthusiasm shown by those serving on the various committees during this campaign was an inspiration and resulted not only in raising the required funds, but in interesting many new friends in our work and should be of great help to us in the future in carrying on our enlarged task. The Ladies' Committee in particular is entitled to the greatest credit and thanks for the remarkable results it attained and the energy it displayed under Mrs. Adees's leadership.

During the year Mr. John Sherman Hoyt, who had served as our President for 20 years, was forced, on account of temporary ill health, to hand in his resignation, which was accepted by the Board of Directors with the greatest regret. Mr. Hoyt had shown during his years in office a devotion to the Hospital and a vision for its future for which we are greatly in his debt and during our campaign in spite of his illness gave us invaluable help: we are glad to say that he has agreed to remain on our Board so that we shall still have the benefit of his advice and interest.

We now anticipate the completion of our new hospital at the Medical Centre by the builder in April and hope to have it fully furnished and equipped some time in June and be in successful operation shortly thereafter.

With our enlarged work, increased responsibilities and heavier budget ahead of us, I most earnestly bespeak on behalf of your Board of Directors the interest and support of all old friends and I hope many new ones.

JOHN I. DOWNEY,
President.

THE BABIES HOSPITAL

REPORT OF THE MEDICAL DIRECTOR, 1928

The Medical Board looks forward with pleasant anticipation to the opportunities and increased responsibilities attendant upon the move to the new hospital. We realize that, with that move, will come our own turn to fully participate in the larger program so successfully carried to this point by the Directors, Board of Managers and Building Committee.

In the Board of Directors, as reorganized by its President, we are finding not only peculiar ability in the business administration of the hospital but also an unusually sympathetic understanding of the many problems which occur in its medical operation.

We look forward also with special pleasure to our association with the newly organized departments of the Superintendent and the Training School for Nurses. The assistance and coöperation already offered by these branches of the service seem to assure, for the future, better care of our patients, wider opportunity for research in and contribution to the knowledge of Pediatrics, increased service to the community through more efficient training of infants' nurses and better education for our affiliated nurses in training.

Several additions to the Medical Staff have been made desirable and necessary to meet the expected increase in the number of patients and our affiliation with other departments of the Medical Centre.

Dr. W. W. Palmer, Professor of Medicine at Columbia and Director of the medical service of the Presbyterian Hospital, has become Consultant in Medicine. Dr. Charles Hendee Smith, Professor of Clinical Diseases of Children at Columbia, Director of the Bellevue Children's Service, has been appointed Visiting Physician. Dr. Smith has given valuable service in connection with the plans for the new hospital and dispensary and has had long experience in hospital administration and teaching. Dr. Howard H. Mason, Assistant Clinical Professor of Diseases of Children at Columbia, and Director of the Children's Service previously maintained in connection with the Presbyterian wards, has been appointed Visiting Physician. Dr.

THE BABIES HOSPITAL

John T. Howell, Jr., Associate in Diseases of Children at Columbia, Assistant Attending to the Children's Service at Presbyterian, has been appointed Adjunct Assistant Attending. Dr. John D. Lyttle, Associate in Diseases of Children at Columbia and for eight years Director of Laboratories on the Children's Service at Bellevue, has been appointed Adjunct Assistant Attending and will be active in the work of the Chemical and Bacteriological laboratories. Dr. Alfred G. Langmann, Associate in Diseases of Children and for the past winter Associate Chief of Clinic in the children's floor at Vanderbilt Clinic has been appointed Adjunct Assistant Attending and Associate Chief of Clinic.

Plans are well under way to meet the increased activities of the laboratories of the hospital. From our present restricted quarters we shall move into laboratories at the new hospital providing adequate space and complete equipment, in Chemistry, with room for ten to twelve workers; in Bacteriology, with desk space for six to eight workers; in Pathology, with desk room for eight to ten workers.

To meet this enlarged program, Dr. Wollstein has gradually increased the pathological staff and given additional assistance to Miss Sullivan in chemistry, and to Miss Kreidel in serology. When the move is made, the personnel of these three laboratories will be prepared to properly operate the new equipment.

During the past year, instead of the bi-weekly visits of a roentgenologist to interpret the plates taken at the hospital, Dr. Lang of the Attending Staff has given this work his daily attention. This has greatly increased the value of the plates taken, as an intimate clinical knowledge of the patient is now closely coupled with the technical interpretation.

In photography, improvement has been brought about through more careful cataloguing and description attached of each negative made. In addition to the previous routine work of the photographic department, motion pictures are now being made of interesting conditions, which otherwise would be impossible of permanent recording. This photographic and mo-

THE BABIES HOSPITAL

tion picture work is valuable both for the completion of hospital records and for teaching purposes.

The officers of the Out-Patient Department have had to meet a double load during the past year, as they have been responsible for the operation of both our Out-Patient Department at the hospital and the children's floor at the Vanderbilt Clinic at the Medical Centre, which will ultimately become the Out-Patient Department of the Babies Hospital.

Early in April, the afternoon free clinic was discontinued at the old hospital and the staff—medical, clerical, social service and nursing—was moved up to the new clinic at the Medical Centre. This has involved some confusion and expenditure of time and travel, but has been beneficial from the standpoint of additional space and facilities offered in the new quarters.

The unselfish desire of the nursing and social service staffs to coöperate and meet all the confusing circumstances which are bound to attend such a period of transition have been greatly appreciated by the Medical Staff.

The rapid growth of the posture, massage and heliotherapy group in the Out-Patient Department, has placed it among one of the valuable branches of the hospital service. This special clinic has more than trebled in size during the past year.

A new special clinic to care for children showing convulsive tendencies has recently been established and is operating in conjunction with similar clinics in the Departments of Medicine and Neurology at the new Vanderbilt Clinic.

A reorganization and enlargement of the budget allowed the Department by the College will be of great benefit to the work in the hospital. We have long suffered from the lack of a group of full and part time men on the staff. The combining of the hospital and departmental personnel in this respect will provide this much needed element.

Up to the present time in our limited space, the presence of students on the wards has been at times a considerable handicap in carrying out of the routine care of patients. Under the new régime, although more teaching

THE BABIES HOSPITAL

will be done, this will be carried out in rooms assigned for the purpose, leaving the ward work unhampered and the patients disturbed to a less degree.

One of the greatest sources of satisfaction to the Medical Board has been the marked improvement in the type of applicants for internship since our expected move to larger quarters has become more widely known. When we transfer to the new location, we will have a Resident, two Assistant Residents and five Internes all of whom have considerable previous experience in the care of children and are unusually fitted to make the work done of a high order of efficiency.

The Hospital has suffered an irreparable loss in the death of Dr. Richard W. Bolling. His influence on not only the surgical work but all the activities of the institution will be felt for many years. Dr. Bolling took up the work initiated by Dr. Downes and has carried it on with such success as to make the reputation of the Babies Hospital perhaps more widely appreciated with relation to infantile surgery than in any other branch of its activity.

The Medical Board is anxious to record its great appreciation of the work of Dr. Bolling in surgery and no less degree of his personal qualities which have made him greatly admired by all with whom he has come in contact.

Respectfully submitted,

H. B. WILCOX,
Medical Director.

THE BABIES HOSPITAL

REPORT OF THE BOARD OF WOMEN MANAGERS OF THE BABIES HOSPITAL FOR 1928

The Board of Women Managers will long remember the strenuous year of 1928, for the active part they took in the Drive to raise \$1,500,000 for the new Babies Hospital at the Columbia Presbyterian Medical Centre. The Women's Committee of the Building Fund was largely made up of members of the Board of Managers who formed the nucleus, and whose exertions increased it to about 100 members. The Committee raised \$682,950.50 of the \$1,748,000 raised altogether, while two of the Board, Mrs. Taylor and Mrs. Butt, as heads respectively of the Graduate Nurses Committee and of the Infant Nurses Committee, raised \$13,924. We feel very proud of the interest and efforts of these two Committees, and are so delighted that they so nearly accomplished their objective, that the Board of Directors feel that they should be credited with the accomplishment, and the rooms they were working for inscribed as their gifts. In addition to working for the Infants and Nurses Committees Mrs. Henry C. Taylor raised the largest sum of money brought in by any manager, excepting the wonderful gift of Mrs. Oliver G. Jennings of a whole floor in memory of her mother, Mrs. Benjamin Brewster. The Cribside Committee, always faithful friends, gave a \$22,000 ward of twelve beds, and the Memorial to Ellen Adele Daniels, raised by her friends, reached the sum of \$11,000 and credited three of the Special Service Rooms.

In February the opera "Carmen" with Mme. Jeritza was given for the annual entertainment, the arrangements with the Metropolitan Opera Co. having been made by Mrs. Henry M. Alexander. Mrs. Bertram H. Borden was Chairman of the Entertainment Committee, and the tremendous success of the performance was largely due to her. The net proceeds were \$15,385.31. Every seat was sold and there were 312 standees.

Mrs. Amory Haskell, Mrs. Deering Howe and Mrs. Stanley Burke, were elected to the Board of Managers during the year, and have already proved helpful friends.

THE BABIES HOSPITAL

Mrs. Henry G. Bartol's resignation was accepted with great regret. Mrs. Bartol and her mother, Mrs. Hone, had together been on the Board of Managers since the early days of the Hospital and we regret the severing of their long association with our work.

Miss Smith's resignation in November was received by everyone with real sorrow. She had been with the Hospital for twenty-three years. Her devotion and loyalty never failed, and her keen interest in every child and person connected with the Hospital was most touching. She will always be missed.

The Social Service Committee had a very busy year. They were tremendously helped in their activities by Mrs. Brewster Jennings, who raised \$600 for them, and by the Cribside Committee who donated \$1,000 for milk and relief.

The Christmas Tree Party, under the direction of Miss Smith, was a great success. About two hundred children came during the day to see the tree, and departed laden with presents.

The Board looks confidently forward to the increased opportunity for service which will be theirs when the new building is opened at the Medical Centre, and the officers count as always on their loyal coöperation and help.

Respectfully submitted,

BETTY TUCKERMAN,
Secretary.

THE BUILDING FUND

Up to December 31, 1928, 1,350 subscribers had given a total of \$1,738,-079.53 to the Building Fund of the Babies Hospital. The first gift was made on March 2, 1926, but it was not until March, 1928 that the campaign for the new Hospital was aggressively under way under the leadership of Mr. John I. Downey, who, with the aid of many loyal helpers on the various Committees, brought it to a successful conclusion on October 30th, 1928. Many of the gifts to this Fund are in the nature of memorials and are to be designated in the new Hospital by suitable inscriptions.

The following is the financial statement for the year 1928:

BUILDING FUND				
<i>Receipts</i>		<i>Disbursements</i>		
1928		1928		
Jan. 1	Balance	\$51,248.26	On Tamblын & Brown contract	\$30,000.00
	Gifts during year, including interest allowed by Banks . . .	864,356.56	On Tamblын & Brown expenses	23,623.54
			Joint Administrative Board . .	1,071.04
			Storage of Desk	16.25
			Insurance on new Hospital . .	1,766.10
			To Presbyterian Hospital, on account of our new building	750,000.00
			Balance	109,127.89
		\$915,604.82		\$915,604.82

In addition to the above cash receipts, there was received a special gift of \$200,000 given through the Presbyterian Hospital for our new building, making the total Building Fund on December 31, 1928, \$1,738,079.53, of which pledges still to be paid amount to \$615,114.78.

FRANCIS LOUIS SLADE,
Treasurer.

Vaccinations, 1 to 3 P. M., every day. Cases.....	137

During the past year the various clinics of the Out-Patient Department have shown a continued good attendance. The Consultant Eye, Skin and Surgical Clinics were inaugurated January 1, 1928. The Heliotherapy Clinic has been combined with the Posture and Massage Clinic under the supervision of a trained heliotherapist. On July 11, 1928, the Pediatric Department of the Vanderbilt Clinic was opened. Part of the Out-Patient Department Staff was assigned to duty there. Also 363 Dispensary patients, living north of 125th Street, were transferred to Vanderbilt Clinic for treatment.

THE BABIES HOSPITAL

ANNUAL REPORT OF THE SOCIAL SERVICE DEPARTMENT

JANUARY 1, 1928, TO JANUARY 1, 1929

Very few changes have occurred in the Social Service Department during the past year. Like other branches of the hospital we have been waiting until the move to the Medical Centre to inaugurate our new ideas.

A change in personnel was made only very early in the year when Miss Elizabeth Campbell and Miss Alice M. Fay replaced Miss Foote and Miss McDermot. Since then these two workers have been able to carry on and develop most efficiently the work of the department.

Our methods of contact with the clinic and ward children have remained practically unchanged. A great deal of home visiting has been done as well as the many interviews in the Social Service Office.

Through the generosity of the hospital and the Social Service Committee we have been able to supply milk to an average of eleven families each month. This meets a very definite and ever present need.

Also because of our interested committee it has been possible to send a great many more children to the country for convalescent care, to fill the gap between the hospital and the home. During the year we have been able to spend \$360.00 more for this purpose than in 1927.

A great many donations and special gifts have been sent in which have made several things possible that otherwise we would have been unable to undertake. We have paid one family's rent for a month to tide them over an unusual emergency and we have paid the fee of an employment agency for two men to secure work so that their families could be kept together. Thanksgiving and Christmas baskets, underwear and sweaters for the children and toys for Christmas are a few indications of our generous friends.

Rumson has once more helped us immeasurably. One hundred seventy-five of the children taken care of there last summer were sent directly by the Social Service Department.

REPORT OF THE CRIBSIDE COMMITTEE

The officers and chairmen for the Cribside Committee for 1928 were as follows:

MISS KATHERINE B. LOCKWOOD.....	<i>Chairman</i>
MRS. HAROLD VAN TINE.....	<i>Vice Chairman</i>
MRS. ROBERT D. STERLING.....	<i>Treasurer</i>
MRS. GEORGE KING.....	<i>Secretary</i>
MRS. WILLIAM F. ALEXANDER.....	<i>Cutting Committee</i>
MRS. JOSEPH RAMÉE.....	<i>Sewing Committee</i>
MRS. FREDERICK K. BARBOUR.....	<i>Social Service Committee</i>
MRS. H. RAWLINS BAKER.....	<i>Nominating Committee</i>
MRS. CARL OTTO M. SPRAGUE.....	<i>Homes for Class Sewing</i>
MRS. WILLIAM F. ALEXANDER.....	<i>Nearly New Shops</i>
MRS. KENNETH O. CHISHOLM.....	<i>Clothing Committee</i>

There were 28 active members, 23 associate members and 1 honorary member. Five new active members were elected during the year. On January 1, 1929, the Committee had a balance of \$2,531.12. There were 155 members of the sewing class which met on Thursday mornings during Lent at houses generously donated for the purpose. The Needlework Guild donated 200 garments to the Hospital.

The Cribside Committee made a donation of \$22,000 for a ward in the new building, and gave \$1,000 to the Social Service Committee; also the annual donation of \$250 for the support of a bed in the Hospital was made.

The Committee continued its connection with the Nearly New Shop throughout the year.

At the December meeting the following officers were elected to serve in 1929:

THE BABIES HOSPITAL

THE SUMMER BRANCH, THE BABIES HOSPITAL

Again it is my pleasure to report on the work of the Summer Branch at Rumson. We were ready to receive the babies in June with Miss Hall as Superintendent, Miss Willows, Assistant Superintendent and Dr. Sweeney, Interne.

Our admissions were light in June and July and this was fortunate as so much rain kept the babies indoors.

This year our entertainment was an outdoor Fete in July on the grounds of Mr. and Mrs. Frederick Douglas' place, The Hermitage. Such a discouraging morning of rain! But the Committee's courage in face of a dreary opening was rewarded by a clear afternoon and evening with a generous attendance and the sum of \$8,900 was deposited to the account of the Summer Branch. During the summer 229 babies were cared for and with the exception of a few cases and these hopeless from the beginning, our little patients all improved during their stay in the country.

Miss Willows and Dr. Sweeney were good officers and Dr. Mersereau is always attentive and helpful. How great is our gratitude and appreciation to our many friends and faithful officers.

MARY OWEN BORDEN,
Chairman.

THE BABIES HOSPITAL

GENERAL RULES

1. The beds of the Hospital are free to the needy poor. Others are charged according to their means.
2. Sick children under three years of age are admitted, excepting those suffering from contagious diseases.
3. Applications for admission should be made at the Hospital during the day, from 9 to 5, although emergency cases are received at any time.
4. The Out-Patient Department, now at the Vanderbilt Clinic, at the Medical Centre, is open daily throughout the year, from 2 to 3 P. M., excepting on Saturdays, Sundays and holidays.
5. Visiting day for friends of patients is Wednesday, from 2 to 4 P. M.
6. Visitors to the Hospital are welcome any afternoon, between 3 and 5.

HOSPITAL CALENDAR

ANNUAL BOARD AND CORPORATION MEETING, second Thursday in January.

REGULAR BOARD OF DIRECTORS' MEETINGS, second Thursday of every month, with the exception of June, July, August and September.

ANNUAL MEETING OF THE BOARD OF WOMEN MANAGERS, second Tuesday in December.

BOARD OF WOMEN MANAGERS—EXECUTIVE COMMITTEE, monthly, except during months of June, July, August and September.

HOUSE COMMITTEE, monthly, from October to May, both inclusive.

NURSES' COMMITTEE, monthly, from October to May, both inclusive.

SUMMER COMMITTEE, monthly, during June, July, August and September.

MEDICAL BOARD, first Monday in January.

CRIBSIDE COMMITTEE, annual meeting in December.

THE BABIES HOSPITAL

REPORT OF THE TRAINING SCHOOL FOR INFANTS' NURSES

To the Directors and Board of Women Managers of The Babies Hospital:

The following 35 young women completed their course of training as infants' nurses during 1928:

SHEILA BARRY	MOLLY KERR	KÄTHE MEYER
MONICA BEIRNE	VOLBERG LARSON	VERA NAKASHIAN
BEATRICE BRADY	SARAH LINEEN	MARY O'NEIL
EDITH BULPITT	MILLIE LOGIE	VIOLET PHILLIPS
ELIZABETH BURNS	TRYNA LOOTSINA	THEODATE RANDOLPH
ROSE CONNELLY	HANNA MCCARTHY	ETHEL READ
ISABEL CRAWFORD	MARY MCCAUL	PAULINE SCHAEFER
MARGARET DUNFORD	NELLIE MCCORMICK	VIVIA SCOBIE
FRANCES FIELD	SUSAN MCGOVERN	KATHLEEN SMITH
DONNA HOWARD	CLARA MALMGREN	SVEA TROLLE
EDITH JENSEN	POLLY MARREN	ELIZABETH VARCONI
KARIN JOHANSON	NELLIE MATHIL	

These young women are instructed in infant feeding, bathing of infants, hygiene of skin, care of mouth, eyes, ears, nose, and all Nursery Hygiene. Their usefulness to the community is one of the purposes of the Babies Hospital.

Mrs. Oliver G. Jennings remembered our nurses at Christmas time with presents of bathrobes for each one, and Miss Lavinia R. Graves, Mrs. Edward T. H. Talmage, Jr., and Mrs. Arthur Lee Warthen, Jr., sent boxes of Christmas candy for them and for the household. Mrs. Henry G. Bartol sent ice cream and cake for them also at Christmas. All of them were grateful for these kind gifts.

THE BABIES HOSPITAL

CRIBS FURNISHED

Twenty-five dollars will furnish a crib for one year

Two furnished in perpetuity by gift in May, 1917, of \$1,000 under the will of Mary Isabel Reese, widow of Brigadier-General Chauncy B. Reese, in memory of her only grandchildren, the little daughters of John and Sarah Brewerton Reese Jolly:

Sarah Brewerton Jolly, born Dec. 19, 1905; died Aug. 18, 1910.

Mary Courtenay Jolly, born Dec. 25, 1907; died March 25, 1914.

One by Mrs. Eben E. Olcott, the "Erskine Crib."

One by Mrs. Swen A. Swenson, "In memory of Mary Margreta."

One by Mrs. William T. Schley.

Two in the name of "Ethelwyn Fox Morrison."

One by Mrs. Edward A. Le Roy, the "Louisa Crib," in memory of her mother.

Three by Mrs. Olney B. Mairs, in the names of "Marjorie," "Boy Blue," and "Constance."

Three by Mrs. Louis W. Dommerich.

One—Anonymous.

One by Mrs. John B. Calvert, in the name of "Mary Dake Mairs."

One by Miss Mildred Sawyer, the "Eleanor Crib."

One by Miss Wynfred Fox, "The Jane Alfring Crib."

Ward with Cribs for Twelve Babies

THE BABIES HOSPITAL

THE CHILDREN'S CHARITY

The Children's Charity is made up of those children who are interested in the work of the Hospital, and want to help it along.

The subscription is One Dollar a year.

Sustaining Memberships, \$5.

Life Memberships, \$20.

A Membership card is sent each year when the dues are received, and every member's name is published in the Year Book of the Hospital.

Five Kinds of People Who Join the Children's Charity

- I. Big boys and girls, who want to help the sick babies.
- II. Children who have come safely through an illness—to show their thankfulness.
- III. Brand new babies—to celebrate their arrival.
- IV. Grown-ups in the name of some child they love, or the child they once were themselves.
- V. In memory of children who have died—to do the good they were not spared to do.

Send your dues, with name and address to

MRS. BREWSTER JENNINGS,
Glen Head, Long Island,
New York.

Make checks payable to THE BABIES HOSPITAL.

NEW YORK

THIS FORTY-FIRST ANNUAL REPORT
IS DEDICATED TO THE CONTRIBUTORS TO THE
FUND FOR THE NEW BUILDING OF THE
BABIES HOSPITAL
AT THE MEDICAL CENTRE

*The Babies Hospital
Broadway at 167th Street*

THE BABIES HOSPITAL

SEVEN FACTS OF INTEREST

THE BABIES HOSPITAL since its incorporation in 1887 has been getting results in making babies better, and now, beginning with its forty-third year, it is caring for babies and children up to twelve years of age.

THE BABIES HOSPITAL during those years has admitted 42,270 babies. Since opening the new Hospital on June 28, 1929, 1,804 have been admitted. It was a struggle for existence with most of them, and skilful nursing has saved many.

THE BABIES HOSPITAL has a Training School for Infants' Nurses, and has graduated 1,140 pupils. These nurses have helped the babies grow strong through careful feeding and the application of our doctrine of "Sunshine, Sleep and Soap."

THE BABIES HOSPITAL offers facilities in its Out-Patient Department, at the Vanderbilt Clinic, for the treatment of poor children, and has contributed its very large share to better health and happiness; 6,598 little patients passed through its doors in 1929.

THE BABIES HOSPITAL operates a Summer Branch at Rumson, New Jersey, where much has been done for sick and convalescent little children by fresh air, sunshine and kindness.

THE BABIES HOSPITAL has for twenty-seven years provided instruction for students of the College of Physicians and Surgeons. Young physicians are here given unusual opportunities for practical study of difficult and unusual cases of disease in young children at first hand.

THE BABIES HOSPITAL has a well-organized Social Service Department so that visits are made to the homes of children admitted to the Hospital, to look into conditions there and supply the help and instruction so often needed.

THE BABIES HOSPITAL

PRESIDENT'S REPORT—BABIES HOSPITAL, 1929

On behalf of the Board of Directors I beg to submit the following report for the year 1929:

1929 has been an eventful year in many ways for Babies Hospital and while we have been able during its course to solve and retire some of our problems, it has brought us up against others which will require the whole-hearted coöperation of all of our present friends and many new ones.

Our first problems in 1929 were the completion, furnishing and equipping of our new Hospital and the creation of an enlarged organization in all departments to successfully operate it.

We were fortunate in obtaining as Superintendent Dr. Charles C. Hedges, an Assistant Superintendent in Johns Hopkins, and as Directress of Nurses Miss Winifred Kaltenbach, who had just completed three years of service in this capacity in the American Hospital at Paris, France, and they successfully worked out the problems of personnel in the departments under their charge so that an adequate force was available on June 25, when we opened our new building, to handle the needs of the situation.

In April we entered into a contract to sell our old property at 55th Street and Lexington Avenue for \$650,000; title was duly passed to the new owners in October, the sale netting us, after the payment of expenses and brokers commissions, \$633,322.

Our new building, with all furniture and equipment, linen, hospital supplies, clothing, etc., to start operations cost approximately \$1,820,000; something over \$1,755,000 of this amount will be paid from the proceeds of our Building Fund Campaign and the balance from unrestricted bequests.

We have found after six months' operation of the new Hospital and a most careful analysis of our budget requirements that it will not be possible to operate the hospital and provide the necessary hospitalization, teaching, laboratory, X-ray and research work with less than an expenditure of ap-

THE BABIES HOSPITAL

proximately \$350,000 a year; even on this amount we are cutting expenses at some points where it will not be possible to do so permanently.

Our estimated income from actual hospital operations is \$120,000, from our endowment \$65,000, so that the balance, \$165,000, must be made up at present from the following sources: Endowed beds, United Hospital Fund, entertainments and annual gifts from the friends of the Hospital. This places a very heavy annual burden on the small group who have heretofore made themselves largely responsible for whatever was needed to balance our budget and requires, in order to successfully solve the problem, more friends at present and in the future an increase in our present endowment of approximately \$1,350,000 to an endowment of \$4,000,000.

Your Board of Directors is now formulating a plan which, it hopes with the support of those interested in the Hospital, will take care of the immediate requirements of the situation until it seems wise to undertake the raising of the necessary additional endowment, thereby solving this problem once and for all.

JOHN I. DOWNEY,
President.

THE BABIES HOSPITAL

REPORT OF THE MEDICAL DIRECTOR, APRIL, 1930

No hospital can claim to be discharging its full duty to the community in which it functions unless three things are being jointly accomplished. These necessary activities are: one, the care of the sick; two, the education of staff, nurses and students; and, three, contributions to the knowledge of the science and practice of medicine.

These were the purposes in mind during the construction of the new plant and the organization of the medical, nursing and administrative personnel.

After ten months of experience in the operation of the new building, the Medical Board finds ample proof of the wisdom of the Building Committee and wishes to express its appreciation of the devotion and efficiency of the Trustees, Managers, Nursing and Administrative staffs.

If the Medical Board can lay claim to the successful discharge of its own peculiar duties, it must give major credit to the officers and members of these committees and departments.

Much of the economy in operation that has been practiced has been made possible by the coöperation of dietitians, supervisors and housekeeping staffs.

Perhaps the most striking development of the year has occurred in the surgical wards. Credit is due to Dr. Donovan and his staff for the smoothness with which the enlarged work has been carried on, and the successful coöperation that has been shown toward the surgical specialties of the College.

The increased load thrown on the Laboratory Departments has been adequately met as to routine, research and teaching. Biochemistry in particular has undergone great expansion. Through the generosity of Mr. and Mrs. Frank P. Garvan in donating and endowing this department, we are possessed of very complete laboratories and equipment. Further expansion is now in process through the conversion of the teaching room on the sixth floor into a special research room for Dr. Warren Sperry, who

THE BABIES HOSPITAL

comes to us as Assistant Professor of Biochemistry in the College of Physicians and Surgeons, and Director of Chemistry in the Babies Hospital.

We believe that we now see established the fruition of our hopes for the creation of an ideal plant where accurate routine study and diagnosis will go on hand in hand with useful research in the biochemistry and physical chemistry of infancy and childhood.

In connection with this department, under the direction of Drs. A. B. MacLean and Sullivan, a metabolism room and ward have been equipped with apparatus, technicians and special nurses for the study of metabolic disease in infancy and childhood.

Members of the Departments of Bacteriology, Pathology and X-ray have combined with Drs. Lyttle, Craig and Campbell for the study of structural defects of the kidney tract and functional disease of the kidney. Valuable information is already coming from this work.

Drs. Merritt and Davidson are continuing their duties at Sloane Hospital in charge of the babies, and with this are carrying on an investigation of the blood in the new born, and a study of premature infants.

The Luetic Clinic, first organized by Dr. Stafford McLean, and since conducted by Dr. Caffey, has for some years provided a needed service to the patients and material for an exhaustive study of the disease. The purposes of the investigation for which this clinic was started having been accomplished, the work will be turned over to the Department of Syphilology and Dermatology of the College, where this particular type of work should best be done.

A special clinic for the care of epileptic children has proved its value and has been successfully carried on by Dr. Metcalf, with the assistance of the dispensary staff.

Dr. J. M. Brush has been appointed Adjunct Assistant Attending Physician. He is making a study of a method of treatment of pneumococcic meningitis and is continuing the care of the diabetic children on the service in connection with the Presbyterian group.

THE BABIES HOSPITAL

Dr. Stafford McLean, associated with Dr. Israel Rappaport who now holds the Holt Fellowship, has recently undertaken the study of the physiology of the lungs and pulmonary circulation in pneumonias. A small ward has been set aside for this purpose.

Children suffering from cardiac disease are under the special supervision of Dr. Langmann, who is also conducting a special clinic for them in the dispensary.

Dr. Wollstein is continuing her study of the relative value of the iron preparation in the treatment of anemias in infancy.

Since January, the interne service has been directed by two house physicians and a house surgeon, as at that time it seemed inexpedient to appoint a new resident. The staff has coöperated well in giving this arrangement a fair trial, but the conclusion is now that it will be better to return to the original plan of a resident in charge of both medical and surgical divisions.

The demand upon the time of the Attending Staff, following the enlargement of the service last July, has increased to such an extent as to make it impossible for them to give adequate time to wards and Out-Patient Department simultaneously. To meet this, the staff has been divided into two divisions to alternately serve six months on the wards and six months in the Out-Patient Department. It is believed that this will result in more efficient service in each branch, create a closer association between wards and clinics, and facilitate the teaching in both.

Dr. Charles Hendee Smith, who though holding the position of Attending Physician at the Babies Hospital, has been assigned to the management and teaching of the Children's Medical Division at Bellevue Hospital, has recently been appointed Professor of Diseases of Children at the New York University and Bellevue Medical College. This has necessitated his resignation from our Departmental and Hospital Staff. His work in the organization and management of the department, and on the Building

THE BABIES HOSPITAL

Committee of the Hospital, has been of the greatest value and a large factor in the success of both.

Dr. F. Elmer Johnson, who has been connected with the Babies Hospital since 1912 in the various positions of interne, Chief of Clinic, Junior and Senior Attending, has accepted a call to the directorship of the Children's Service at St. Luke's Hospital. There has been no more loyal friend among our group than he and, while his absence will be keenly felt by the Medical Board, we are content in the belief that both institutions will profit by the affiliation that his directorship at St. Luke's will bring about.

Dr. Johnson will retain his academic position and continue his teaching for the Department.

During the past year, Dr. Caffey has been giving his full time to teaching and development of the X-ray Department. The value to the service of the improvement and enlargement of the latter cannot be over-estimated. A surprisingly large volume of work of the highest grade is being done and the department is rapidly becoming self-supporting.

The work in physiotherapy, both on the wards and Out-Patient Department, has been greatly expanded. It is perhaps now the most popular special clinic held in the dispensary and is also on more than a self-supporting basis.

Respectfully submitted,

HERBERT B. WILCOX, M.D.,

Medical Director.

THE BABIES HOSPITAL

REPORT OF THE BOARD OF WOMEN MANAGERS OF THE BABIES HOSPITAL FOR 1929

The year 1929 was one of great importance to the Babies Hospital, for on June 25th the doors of the new Hospital were opened. The building meets every requirement of a modern hospital, and we feel sure that all who so generously contributed toward its completion, either through time or money, will derive a lasting feeling of satisfaction in the results accomplished.

The Hospital has been most fortunate in having secured the able and efficient services of Miss Winifred Kaltenbach as Superintendent of Nurses, and the staff assembled under her direction has accomplished the difficult task of organization with great success.

The annual entertainment in 1929 was the opera, "Jonny Spielt Auf," given at the Metropolitan under the able chairmanship of Mrs. L. Havemeyer Butt. The arrangements with the Metropolitan Opera Company were conducted as usual by Mrs. Henry M. Alexander. The net proceeds of the performance amounted to \$9,536.50, and both Mrs. Butt and Mrs. Alexander are to be congratulated on this result.

The resignation of Mrs. John B. Calvert as Treasurer of the Babies Hospital was received by the Directors with great regret. Mrs. Calvert will continue a member of the Board of Managers on which she has been continuously since 1887. Mrs. Lothrop M. Weld was elected Assistant Treasurer.

Mrs. Ira Barrows resigned as Vice-President and Miss Anna B. Evans as Chairman of the House Committee, a position she has filled with tact and efficiency for many years. We are happy to have these ladies and Mrs. Calvert still continue members of the Board of Managers.

Mrs. Carl O. M. Sprague's resignation from the Board was accepted with much regret.

Mrs. Philip Kip Rhinelander, Mrs. S. W. Straus, Mrs. Francis P. Garvan,

THE BABIES HOSPITAL

Mrs. Morton L. Schwartz and Mrs. Raymond J. Schweizer were elected to the Board of Managers during the year.

The Summer Branch of the Hospital, at Rumson, New Jersey, opened on June 6th. The large sum of \$10,000 was raised at their entertainment.

Mrs. Bertram H. Borden's resignation as Chairman of the Summer Branch Committee came as a blow to all of us, as the tremendous success of this Branch for so many years has been largely due to her. However, we have been most fortunate in procuring Mrs. Amory L. Haskell to take her place.

The hope for the future of the new Hospital greatly depends on the coöperation, interest, and help of the Board of Women Managers. The officers keenly desire that each member will have a real feeling of responsibility toward making the Hospital of still greater value to the babies and children of the City of New York.

Respectfully submitted,

BETTY TUCKERMAN,
Secretary.

THE BABIES HOSPITAL

Extract from the Minutes of the regular monthly meeting of the Board of Directors of The Babies Hospital, held January 9, 1930:

The resignation of Mrs. John B. Calvert as Treasurer of The Babies Hospital was received with regret by the Board of Directors, and on motion duly made and carried the following Resolution was unanimously adopted:

WHEREAS, Mrs. John B. Calvert has been a member of the Board of Managers of The Babies Hospital since its organization in 1887, Recording Secretary of the Board of Managers from 1894 to 1897, a Director and Treasurer of the Current Fund since 1897,

AND WHEREAS, Having been connected with the Hospital for forty-two years, and its Treasurer for thirty-three years, she holds a record for devoted and faithful performance in an important official position unsurpassed in the history of the Hospital organization,

AND WHEREAS, The Board of Directors deeply appreciate such loyalty and co-operation, and desire that this tribute be placed upon the Minutes, and printed in the Annual Report,

Be It Therefore Resolved, That this Board through this Resolution, express to Mrs. Calvert its deep appreciation of her loyalty and long service to The Babies Hospital, and its gratification that she will continue her membership on the Board of Women Managers, and

Be It Further Resolved, That these preambles and Resolution be spread upon the Minutes and printed in the Annual Report, and a copy forwarded to Mrs. Calvert.

JOHN I. DOWNEY,
President.

JOHN W. HORNOR,
Secretary.

THE BABIES HOSPITAL

REPORT OF THE OUT-PATIENT DEPARTMENT, 1929

The year 1929 has seen a tremendous change in the character and scope of the Babies Hospital Out-Patient Department work. From January 1st to April 1st two clinics were maintained, one at the old building and the second in the Vanderbilt Clinic as the Pediatric Department of the Vanderbilt Clinic and Presbyterian Hospital. On April 1st, the dispensary at Fifty-fifth Street was closed and the entire staff was transferred uptown. When the Babies Hospital opened its new building on July 1st, coördination between the in-patient and out-patient services became the chief problem. This has been gradually and progressively met in satisfactory fashion. There are, however, features of the work under the new conditions which will bear comment and stimulate thought as to problems of the future.

First, the increased number of patients as compared with the number at the old hospital presents a problem, the solution of which will probably vary from time to time. During the past year there were made to the clinic about 25,000 visits, of which some 5,000 were new patients. The daily average number of patients per clinic day was 101, of which 21 were new patients. This traffic problem is now being handled very satisfactorily. We have at present thirty-two physicians enrolled on the staff of the department, and it is only through their united and continued efforts in coöperation with the nursing and clerical staffs that this number of patients can be adequately cared for in this ambulatory service.

Second. The problem of patients' records has been a difficult one in adjusting the clinic to new conditions. The records of this clinic are now kept in the central record room of the Medical Center. The handling of these records has improved vastly during the last few months and we look forward to further improvement along these lines.

Third. During this year it has been found advisable to open and maintain special clinics for the study or treatment of various conditions. This has been necessitated by the increased number of patients seeking treat-

THE BABIES HOSPITAL

ment, by the increase in the staff of physicians and the increase in the age limit of the patients to twelve years. Special mention should be made of the clinic for posture and massage and heliotherapy, organized and operated by Mrs. Eisenmenger. In addition she utilized the roof of the hospital for sun classes during the summer. This has been a splendid piece of work splendidly done. Doctor Caffey's clinic for the study and treatment of congenital syphilis has carried on well its increasing work. The cardiac clinic has been organized by Doctor Langmann. Doctor Metcalf has continued his work, begun last year, with epileptic children. Children with nephritis or pyelitis or other urinary troubles are cared for in clinics for these purposes. Rather than at once institute new clinics for the study and treatment of allergic and diabetic children, Doctor Bergstrom has been assigned to the general allergy clinic and Doctor Brush to the diabetic clinic of Vanderbilt Clinic to study and care for the children in these departments. It has been our privilege to coöperate with the Department of Medicine in anthropometric studies of children and with the Department of Psychiatry in their studies of child behavior. In addition, the premature infants born in Sloane Hospital have been cared for in a special clinic for that purpose.

Fourth. Close coördination with hospital proper has facilitated the study and treatment of patients. The Pathological Department has assigned technicians to this department, and the X-Ray Department has coöperated fully. It is only right that note should be especially made of the splendid work of the Social Service Department under Miss Stilwell. Of necessity in the Out-Patient Department a tremendous amount of work has been referred for social service to the great good of the patient and the satisfaction of the physician.

The organization and management of a new clinic as large and as complex as this present difficulties which only those in the thick of it appreciate. This is especially true when new relationships have to be established with other units such as Vanderbilt Clinic, Presbyterian Hospital and Sloane

THE BABIES HOSPITAL

Hospital. We feel, however, that this work has been well begun and that the pace is well set.

It would be ill-fitting to close this report without certain acknowledgments: first to Doctor Wilcox for his support and his counsel at every turn, for his patience and far-sightedness; secondly to Miss Marguerite Mattice, who has been the wheel-horse in this task, without whose loyalty, energy and administrative ability the problems would have been much greater; and lastly very sincere acknowledgment should be made of the patience, loyalty and skill of the physicians who constitute the clinic.

Respectfully submitted,

HOWARD REID CRAIG, M.D.,
Chief of Clinic.

Afternoon Clinic, 1:30 to 3 P.M., every day except Sundays, Saturdays and holidays.

THE BABIES HOSPITAL

ANNUAL REPORT OF THE SOCIAL SERVICE DEPARTMENT

JANUARY 1, 1929 TO JANUARY 1, 1930

1929 has brought a large increase in the scope and activities of the Social Service Department.

There was a great deal of interest in our future plans when the Babies Hospital should move to the Medical Center in June. It seemed advisable in January to send one worker to the Pediatric Clinic which was already in session at the Medical Center. This meant a great increase in work and, in order to meet it, the Social Service Committee agreed to take over, temporarily, the salary of an additional worker.

The Vaginitis Clinic, which had been a responsibility of the Presbyterian Social Service, was turned over to us on February 1st, and this meant intensive work and follow-up. At this time an Epilepsy Clinic was started and arrangements for metric scales and special diets for these children were made. Since then several other clinics have been inaugurated which require a great deal of following by this department. The Premature Clinic and a Cardiac Clinic, under the auspices of the New York Heart Association, have been the most demanding.

At present we have Miss Mildred Stilwell, who has been our department head for the past three years, Miss Elizabeth Campbell, Miss Ruth Englehorn, Miss Ray Breakstone, and a secretary, Miss Kathryn Crowell. We are greatly indebted to them for their hard work and deep interest, especially in a very difficult time of readjusting and enlarging our work at the Vanderbilt Clinic.

For several months during the year Presbyterian nurses went out weekly with one of our social workers and seemed to be greatly interested in the different types of tenement homes and problems encountered there.

On June 6th the Babies Hospital Summer Home at Rumson opened and between then and early September, one hundred and three of our own children received three weeks or more convalescent care. They were taken

THE BABIES HOSPITAL

back and forth by a specially chartered bus which seemed to be much easier for them than the changes necessitated by going by boat. Exclusive of Rumson, we were able to send one hundred and seventy-one babies and children to the country for convalescence, providing a total of 6,102 days' care. One hundred and forty-four of these were received free of charge, eighteen were sent at the expense of their families and nine received care at the expense of the Social Service Committee at a cost of \$242.35.

Milk, costing \$583.44, Christmas and Thanksgiving baskets, metric scales, splints, braces, cribs, clothing, toys at Christmas, room rent and medicine, are a few of the things made possible by generous gifts. A fund for baby carriages has also been started.

In many ways the past year has been one of particular interest, but it is with the hope of being more useful that we look forward to 1930.

HELEN BARBOUR,

Chairman, Social Service Committee.

THE BABIES HOSPITAL

REPORT OF THE CRIBSIDE COMMITTEE

During the year of 1929 the Cribside Committee successfully carried on its usual work.

Payments were made to the Hospital Building Fund on its pledge of \$22,000. A hospital bed was supported and \$1,000 was donated to the Social Service Committee. The Lenten Sewing Class was held as usual with thanks to the good friends who loaned their homes for the meetings and those who joined the class. Hundreds of much needed garments were made.

A Bridge Party was held in November at the Plaza Hotel, netting over one thousand dollars.

The Committee gratefully appreciates the aid of its many friends, especially the American Red Cross for cutting all the garments for the Lenten Sewing Class, the Needlework Guild of America for their very generous contribution of clothing, of Mr. W. Henry Williams for his donation of the use of the Plaza Ball Room for the "Bridge" party, and of their many friends who have sent articles to the Nearly New Shop.

MARGARET I. CHISHOLM,
Secretary.

THE BABIES HOSPITAL

REPORT OF THE SUMMER COMMITTEE

Inspired by the opening of our new home at the Medical Center, we opened, with fresh vigor, the Summer Branch at Rumson on the 6th of June. The buildings were newly painted without and within, and everything was in complete readiness when the large and comfortable bus arrived bringing our first patients. Every three weeks all summer they were transported to and from New York.

Some babies remained three weeks, others six and a few cases, in need of our care, all summer. This gave fewer admissions than in past years—only 103 in all—but we believe we did a greater good. The average gain in weight in each child was one pound seven ounces. Our home physician, Dr. Wishik, was so careful and excellent and the Committee were most appreciative of the excellent choice of officers—Miss Cook, the Superintendent, and Miss Wood, the assistant. They were so full of enthusiasm for their work and untiring in their care of the babies. Mrs. Ogilvie, the housekeeper, gave great satisfaction, and we had reason to be proud of our storerooms and kitchen. Indeed, we are truly grateful for the happy work of the entire staff, which includes the interest and attention of Dr. Mersereau, our Consultant.

In July we gave our annual benefit—A “Monte Carlo” Night—a colorful and highly amusing evening and a great success, and \$10,000 was cleared.

Another summer has gone by and I feel that the work has been well carried on, and I wish to thank all who have been so generous and faithful.

MARY OWEN BORDEN,
Summer Chairman.

THE BABIES HOSPITAL

GENERAL RULES

1. The beds of the Hospital are free to the needy poor. Others are charged according to their means.
2. Sick children up to 12 years of age are admitted, excepting those suffering from contagious diseases.
3. Applications for admission should be made at the Hospital during the day, from 9 to 5, although emergency cases are received at any time.
4. The Out-Patient Department, at the Vanderbilt Clinic, of the Medical Center, is open daily throughout the year, from 2 to 3 P.M., excepting on Saturdays, Sundays and holidays.
5. Visiting day for friends of patients is Wednesday, from 2 to 4 P.M.
6. Visitors to the Hospital are welcome any afternoon, between 3 and 5.

HOSPITAL CALENDAR

ANNUAL BOARD AND CORPORATION MEETING, second Thursday in January.

REGULAR BOARD OF DIRECTORS' MEETINGS, second Thursday of every month, with the exception of June, July, August and September.

ANNUAL MEETING OF THE BOARD OF WOMEN MANAGERS, second Tuesday in December.

BOARD OF WOMEN MANAGERS, second Tuesday of every month, from October to May, both inclusive.

BOARD OF WOMEN MANAGERS—EXECUTIVE COMMITTEE, monthly, except during months of June, July, August and September.

HOUSE COMMITTEE, monthly, from October to May, both inclusive.

NURSES' COMMITTEE, monthly, from October to May, both inclusive.

SUMMER COMMITTEE, monthly, during June, July, August and September.

MEDICAL BOARD, first Monday in January.

CRIBSIDE COMMITTEE, annual meeting in December.

THE BABIES HOSPITAL

REPORT OF THE SCHOOL OF NURSING

GENTLEMEN:

I have the honor to present the annual report of the School of Nursing for the year ending December 31, 1929.

The move made by the Babies Hospital to the Medical Center in June, 1929, has necessitated a complete reorganization of the nursing service. One of the responsibilities assumed by the Babies Hospital in becoming a unit of the Medical Center was the instruction of the Presbyterian nurse in Pediatric Nursing. The State requires that in order to be registered a nurse must have had during her course, three months' instruction in this branch of nursing. Taking over the children's ward of the Presbyterian Hospital required also taking over the nurses. As the Presbyterian nurses were not sufficient in number for all of our patients, and as the instructors and equipment for instruction could take care of double the number of students, affiliations with other hospitals were arranged. Until these affiliations could be consummated it was necessary to have graduate floor nurses. This necessitated considerable initial increase in the nursing budget. By the conclusion of the year, however, the course in Pediatric Nursing was formally approved by Albany and affiliations with the following schools established:

The Presbyterian Hospital at the Medical Center.

St. Luke's Hospital, Bluefield, West Virginia.

Hudson City Hospital, Hudson City, New York.

Vassar Brothers Hospital, Poughkeepsie, New York.

The House of Mercy Hospital, Pittsfield, Massachusetts.

The increase in the number of affiliating students made it possible to reduce the number of graduate floor nurses and the following organization evolved:

School Office:

Director of Nursing

Assistant Director of Nursing

Educational Director, who is also Instructor and Teaching Supervisor

THE BABIES HOSPITAL

Assistant Instructor and Teaching Supervisor

Night Director

Assistant Night Director

Operating Room:

Head Nurse

Assistant Head Nurse

Graduate Infants' Nurse

Each of the Six Floors:

Head Nurse

Assistant Head Nurse

In addition to the above graduate staff there are three graduate floor nurses during the day and one at night. When there is a turnover of one fourth of the nurses every six weeks the above graduate staff is the minimum requirement for carrying on the nursing of the patients and the instruction of the nurses.

The infants' nurse, who has always been one of the valuable contributions of the Babies Hospital to the community, will find in the new Hospital increased facilities for experience and instruction in the work for which she is being prepared. We have at the new Hospital accommodations for twenty-five infants' nurses. This number cannot take care of both the nursing at Rumson and here at the Hospital during the summer months. It was therefore necessary to supplement the undergraduate nurses with graduate infants' nurses at Rumson. We were particularly fortunate in our staff at Rumson, last summer, with Miss Emma Cook as Superintendent and Miss Helen Wood, Assistant Superintendent, and Dr. Wishik as Resident Physician.

Dr. Marjorie Strauss has been appointed as physician for the nurses. Her coöperation and interest, as well as her medical advice, have been very much appreciated.

For recreation the nurses are indebted to the Presbyterian Hospital for extending the use of the swimming pool at Maxwell Hall to the students at the Babies Hospital. The nurses are looking forward to using the tennis

THE BABIES HOSPITAL

court which was built last fall for the Babies Hospital. Friends of the Hospital have been generous in sending tickets for operas and concerts which have been enjoyed by the nurses, and the infants' nurses were again generously remembered by Mrs. Oliver G. Jennings at Christmas time.

The new Hospital is beautifully planned for the comfort and nursing of both the very sick child and the convalescent child. We have had many visitors who were enthusiastic about the attractiveness, convenience and cheeriness of the wards. This was particularly evident Christmas Day, when the wards were in their holiday attire and the children happy with their gifts from Santa Claus.

We are looking forward to an organization which will be able through the instruction and experience given to both affiliating students and infants' nurses, to contribute definitely to the well being of child life.

During the difficult period of moving and reorganization the coöperation of the Boards of Managers, the School of Nursing Committee, the Medical Staff and the Nursing Staff, have been deeply appreciated.

WINIFRED KALTENBACH.

The following forty infants' nurses completed their course of training during 1929:

ELLEN ANDERSON	HELGA JENSEN	BRIDIE O'SHEA
BARBARA ANDREWS	INGEBORG JEPPSON	LILLIAN OTTO
VERONICA ARMSTRONG	KATHLEEN LANE	BEULAH PAYNE

THE BABIES HOSPITAL

Other Income:

Income from investments	\$36,266.40
Donations—general	32,892.70
Entertainment	14,505.80
Support of beds	9,750.00
Annual subscriptions	8,176.82
Rent of old Hospital building	7,500.00
United Hospital Fund	6,134.61
Special reserve appropriations	5,912.28
Interest on bank deposits	3,429.28
Furnishing cribs	250.00
	<hr/>
Total other income	\$124,817.89
	<hr/>
Deficit, year ended December 31, 1929	<u><u>\$45,164.54</u></u>

Note.—The above statement does not include the transactions of the Rumson, N. J., Branch.

We have audited the books and accounts of The Babies Hospital of the City of New York for the year ended December 31, 1929, and in our opinion, the above statement of income and expense of the Current Fund correctly states the result of operations for the year ended at that date.

HURDMAN AND CRANSTOUN.

CRIBS FURNISHED

Twenty-five dollars will furnish a crib for one year

Two furnished in perpetuity by gift in May, 1917, of \$1,000 under the will of Mary Isabel Reese, widow of Brigadier-General Chauncy B. Reese, in memory of her only grandchildren, the little daughters of John and Sarah Brewerton Reese Jolly:

Sarah Brewerton Jolly, born Dec. 19, 1905; died Aug. 18, 1910.

Mary Courtenay Jolly, born Dec. 25, 1907; died March 25, 1914.

One by Mrs. Eben E. Olcott, the "Erskine Crib."

One by Mrs. Swen A. Swenson, "In memory of Mary Margreta."

One by Mrs. William T. Schley.

Two in the name of "Ethelwyn Fox Morrison."

One by Mrs. Edward A. Le Roy, the "Louisa Crib," in memory of her mother.

Three by Mrs. Olney B. Mairs, in the names of "Marjorie," "Boy Blue," and "Constance."

Three by Mrs. Louis W. Dommerich.

One—Anonymous.

One by Mrs. John B. Calvert, in the name of "Mary Dake Mairs."

One by Miss Mildred Sawyer, the "Eleanor Crib."

One by Miss Wynfred Fox, "The Jane Alfring Crib."

This child, Viola M., one of our little patients this year, has the crippling deformity of a double congenital dislocation of the hip, and yet is bright and cheerful, as you see, under her misfortune. She is improving under our Hospital care.

THE BABIES HOSPITAL

THE CHILDREN'S CHARITY

The Children's Charity is made up of those children who are interested in the work of the Hospital, and want to help it along.

The subscription is One Dollar a year.

Sustaining Memberships, \$5.

Life Memberships, \$20.

A Membership card is sent each year when the dues are received, and every member's name is published in the Year Book of the Hospital.

Five Kinds of People Who Join the Children's Charity

- I. Big boys and girls, who want to help the sick babies.
- II. Children who have come safely through an illness—to show their thankfulness.
- III. Brand new babies—to celebrate their arrival.
- IV. Grown-ups in the name of some child they love, or the child they once were themselves.
- V. In memory of children who have died—to do the good they were not spared to do.

Send your dues, with name and address to

MRS. BREWSTER JENNINGS,
Glen Head, Long Island,
New York.

Make checks payable to THE BABIES HOSPITAL.

THE BABIES HOSPITAL

SEVEN FACTS OF INTEREST

THE BABIES HOSPITAL since its incorporation in 1887 has taken care of children under five. Since 1929 its usefulness has been much increased by admitting all children up to twelve years of age.

THE BABIES HOSPITAL, now in its forty-fourth year, has admitted 44,590 babies. Since opening the new Hospital on June 28, 1929, 4,124 have been admitted. It was a struggle for existence with most of them, and skilful nursing has saved many.

THE BABIES HOSPITAL has a Training School for Infants' Nurses, and has graduated 1,156 pupils. These nurses have helped the babies grow strong through careful feeding and the application of our doctrine of "Sunshine, Sleep and Soap."

THE BABIES HOSPITAL offers facilities in its Out-Patient Department, at the Vanderbilt Clinic, for the treatment of poor children, and has contributed its very large share to better health and happiness; 6,531 little patients passed through its doors in 1930.

THE BABIES HOSPITAL operates a Summer Branch at Rumson, New Jersey, where much has been done for sick and convalescent little children by fresh air, sunshine and kindness.

THE BABIES HOSPITAL has for twenty-eight years provided instruction for students of the College of Physicians and Surgeons. Young physicians are here given unusual opportunities for practical study of difficult and unusual cases of disease in young children at first hand.

THE BABIES HOSPITAL has a well-organized Social Service Department so that visits are made to the homes of children admitted to the Hospital, to look into conditions there and supply the help and instruction so often needed.

THE BABIES HOSPITAL

PRESIDENT'S REPORT—BABIES HOSPITAL, 1930

On behalf of the Board of Directors I beg to submit the following report for the year 1930:

On December 31, 1930, we completed our first full year's operation in our new building, and, I think, can feel that our organization functioned under the leadership of Dr. Wilcox, Medical Director, Dr. Hedges, Superintendent, and Miss Kaltenbach, Superintendent of Nurses, in a very creditable and satisfactory way, and that we have demonstrated our ability to handle successfully the enlarged work and responsibilities we assumed when we moved to the Medical Center in June, 1929.

While we have had many problems to meet, some of which have been satisfactorily solved and others remain to be solved, by far the most difficult and serious question before us at the moment is one of finance.

Our operating costs even cut to the utmost amount to \$360,000 a year and our income from hospital operations is approximately \$130,000, leaving \$230,000 to be obtained from other sources. This situation is, of course, due to the fact that a large part of our hospitalization is free or only partly paid, and our laboratory, research and teaching work, while essential in the operation of a modern hospital and to meet our obligations to the Center, are of necessity expensive.

The cost of the Hospital with its furnishings and equipment, \$1,820,000, necessitated our drawing from the funds obtained from the sale of our former hospital some \$70,000, and we have further had to infringe on these funds in order to make up our operating deficit in spite of the fact that the members of your Board of Trustees and Women Managers and other good friends contributed some \$84,000 last year toward this deficit, and the ladies ran off two very successful entertainments, netting \$15,000.

To sum up the situation, we have to raise some \$130,000 to balance our annual budget until such time as general financial conditions make it seem possible to attempt a substantial addition to our Endowment Fund. This is not an easy thing to do under present conditions, but we have put our

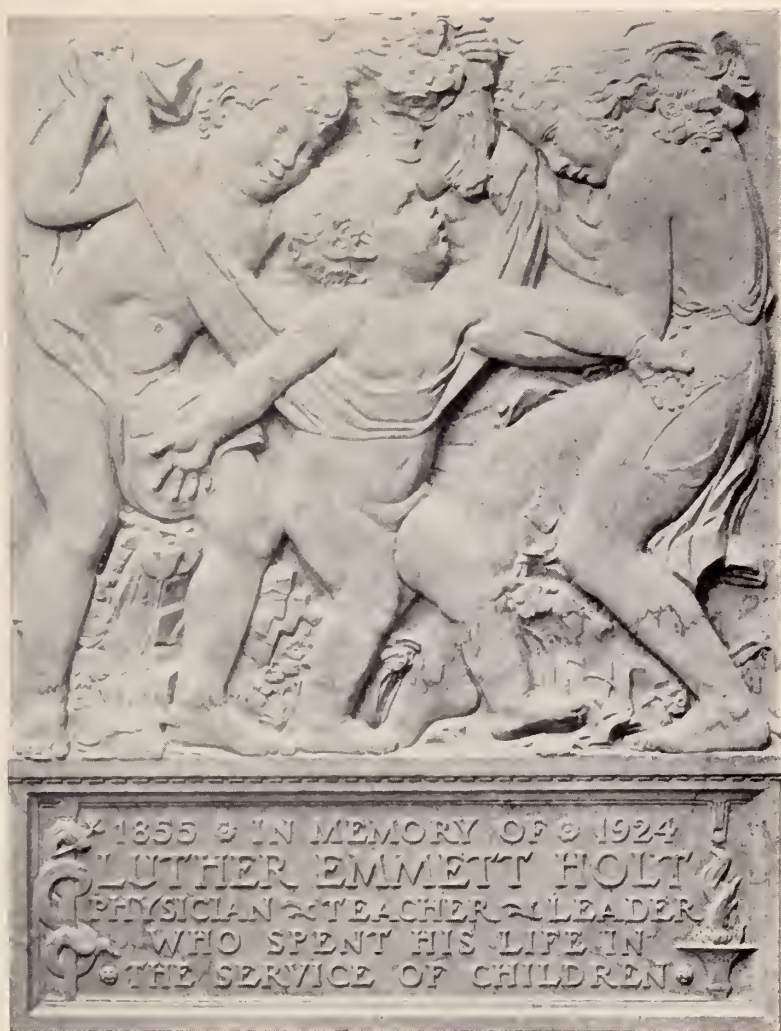

THE BABIES HOSPITAL

hand to the plough and cannot turn back, and I most earnestly bespeak the continued generous support of our friends during this very difficult period.

During the year the very beautiful reception room, north of our Broadway entrance on the ground floor, was completed, including the memorial tablet to Dr. L. Emmett Holt, the expense of this room having been met from funds donated for this purpose by Dr. Holt's family.

It is a great satisfaction to have in our Hospital a permanent memorial to one who, during a period of some thirty-six years of almost uninterrupted service, was in such a large measure responsible for the policies, growth and success of the Hospital and whose love for babies, coupled with his remarkable professional skill and knowledge, resulted in doing so much not only for the babies of his time but also for those of the present and future generations.

JOHN I. DOWNEY,
President.

*Marble Tablet presented to The Babies Hospital by Mrs. Holt,
in memory of Dr. L. Emmett Holt*

THE BABIES HOSPITAL

ANNUAL REPORT OF THE MEDICAL DIRECTOR, MARCH, 1931

The continuous advance of medicine is best assured by thorough study of each clinical problem as it presents itself to our institutions equipped for exhaustive investigation. The obligation laid on every medical board is the reduction of the number of diseases requiring hospitalization through the compiling of facts pertaining to diagnosis and treatment. Therefore, the gauge of efficiency of hospital work is found in the character of its records.

These must contain comprehensive information not only with regard to actual symptoms evidenced during the stay in hospital but, in addition and just as important, a certain amount of negative evidence by which possible alternate diagnoses are ruled out.

Investigation of this sort involves equally the medical, nursing and laboratory staffs, technical and clerical aid, apparatus and facilities for biological experimentation and an adequate follow-up and social service.

Parallel to this activity obviously goes corresponding responsibility in the teaching of students involving increasing demands in number of instructors and the time given by them.

There have been no changes in the attending staff during the past year. Next July, however, we will gain impetus by the addition to our number of Dr. Rustin McIntosh, who will occupy the chair of Pediatrics at the College, and Dr. Alexander A. Weech, who will work in both a clinical and chemical capacity.

The Medical Board is particularly happy over Dr. McIntosh's return. After finishing his internship at the old Babies Hospital in 1922, he held the position of Resident for the following year. From 1925 to 1926 he served as Chief of Clinic and Adjunct Assistant Attending Physician to the Hospital.

In 1927 the first step was taken toward introduction of a full-time group in the Medical Board. At their request, Dr. McIntosh then gave up his practice and hospital work to go to Baltimore on a traveling scholarship

THE BABIES HOSPITAL

from the College of Physicians and Surgeons for the purpose of better fitting himself for full-time academic institutional work.

In June, 1930, the committee appointed by the Faculty of Columbia nominated him as Carpentier Professor of Diseases of Children to begin his work in July, 1931.

This train of events has been a particular satisfaction to the present departmental head. For the past ten years, the aim of the Department of Pediatrics has been to so develop as to be capable of attracting desirable men from other clinics to work with our own. The plan was further to gradually place the Department on an academic basis with a staff consisting of full-time clinical research workers, complemented by a part-time group of teachers and hospital attendants.

With the advent of the Babies Hospital staff to the Department in 1925, it became equally a part of our ambition to have as the future departmental head one of our own original group rather than to go to other sources to fill this position. From the first, Dr. McIntosh was considered to be that one of the group possessing the various qualifications desired as to clinical experience and judgment, capacity for original work in the field of research and for the stimulation and direction of this phase of hospital activities. Fortunately, Dr. McIntosh's choice as to his future medical career coincided with our desires and, with his return at the end of this period of special training, the Medical Board looks forward to a period of increased usefulness for the Hospital in the field of medical education.

The administrative duties of both Hospital and Department have proved more than could be well carried on by any single member of the Department. For this reason, and for an indefinite period, the medical directorship of the Hospital will remain in the present status, differing only in that it will be separate from departmental administration.

At the end of the present school year, Dr. McCune will be transferred to the Departmental Staff, retaining his position as Resident but undertaking, in the place of some of these duties, additional work in relation to teaching and research. To make this possible, Dr. Chipman will continue for an-

THE BABIES HOSPITAL

other year in the position of Assistant Resident. We have to record our appreciation of the efficiency and tactful performance by Dr. McCune of his duties as Resident and the unusual quality and spirit of the interne staff.

The Hospital's reputation rests as much on the attitude of the latter to the anxious parent as on the success of their treatment of the patient, and in this respect the house officers have exhibited the human touch.

Perhaps no department is so consistently involved in all that happens to a child from admission to discharge as is the Department of Nursing. It is equally true that no one factor plays so great a part in the outcome of our efforts as the quality of nursing provided. We believe that the education of our nurses and their performance on our wards is of a high grade. At the same time, we are convinced that these standards have been maintained with difficulty by an insufficient personnel. The Medical Board is hopeful that means may soon be found to make the increases desirable in this branch of the hospital work.

The Department of Educational Nursing, recently established under Miss McAlpin, has become a valuable asset, providing as it does means for the care of the mental as well as the physical health of our children.

Perhaps our greatest problem has lain in the Out-Patient Department. It was instituted before the hospital moved from our old location. The demands on the staff, because of rapidly increasing numbers of patients, have been very great. The services rendered by Drs. Craig and Langmann in the establishment and organization during these first years have been greater than is generally appreciated.

It has become evident that ideally there should be one full-time man in charge of the Out-Patient Department. This has not been possible both because no one of our staff has been in a position to give this time and because a supporting salary has not been available. For the present, at least, the problem of the afternoon clinics has been met by the appointment of Dr. Charles A. Lang, who is to give his attention to the out-patient to the exclusion of ward work. It is expected that before long a similar arrangement will be made to cover the morning special clinics.

THE BABIES HOSPITAL

In the first paragraph, mention was made of the amount of routine investigation necessary for the completion of the study of our patients. Such study must be complete not only with respect to the present diagnosis and treatment but also, and most particularly, must the record made today stand the scrutiny and supply the needs of the future investigator who goes to our files for information. Today thousands of records have the value of waste paper only because of lack of detail. Our laboratory staffs are devoting much time to the performance of these routine observations.

Adequate space, personnel and apparatus must be provided for this work if our records are to stand as future evidence of present exact and exhaustive methods of procedure.

The record of the past year as to contributions to medical knowledge has been in the main satisfactory. The study of problems already under way has been continued and amplified. New subjects have been added to those already in hand and have replaced those completed. Among these are:

The Blood in Prematures	The Arthropathies
Anemias in Infancy	The Cause and Course of Developmental Defects
Heart Disease in Children	X-Ray Diagnosis
The Physiology and Pathology of the Pulmonary Tract	Diabetes
Coeliac Disease	Methods of Intra-venous Medication
Pyurias	Epilepsy
Congenital Deformities of the Kidney	The Metabolism of Fats and the Role of Cholesterol in Infections
Intoxications	Nephritis
Empyemas of Infancy	

HERBERT B. WILCOX,
Medical Director.

THE BABIES HOSPITAL

REPORT OF THE BOARD OF WOMEN MANAGERS OF THE BABIES HOSPITAL FOR 1930

During the past year the following were elected to the Board of Women Managers: Mrs. Wyllys R. Betts, Jr., Mrs. Crawford Hill.

The resignations of the following were accepted by the Board with much regret: Mrs. Ira Barrows, Mrs. Kenneth O. Chisholm, Mrs. John B. Cornell, Mrs. Holt Lowry, Mrs. S. W. Straus.

Mrs. Barrows, Mrs. Chisholm and Mrs. Cornell had been on the Board for a long time, and it is a real sorrow to have them feel, for various reasons, that they can no longer attend our meetings.

On April 24th, Mr. John I. Downey gave a luncheon at the Riding Club for the joint Boards in order to discuss the means for raising funds to meet the budget for 1930. The amount of \$82,000 was raised by a spring drive among the directors, managers and friends.

The Entertainment Committee gave as the regular benefit for the Hospital a performance of "Sons O'Guns" on December 29, 1930, which netted \$7,400. They also undertook to sell the boxes at the second Paderewski Concert at Carnegie Hall, on November 29th, the proceeds of which were \$8,050, a total for 1930 of \$15,450. All arrangements for the theatrical performance and for the concert were made by Mrs. Henry M. Alexander, and to her is due the excellent terms and kind assistance rendered us by the management of Carnegie Hall. Mrs. Francis P. Garvan was chairman for the concert and took entire charge of the distribution of the tickets, which was of great assistance to the committee.

The Summer Branch of the Hospital at Rumson, New Jersey, under the chairmanship of Mrs. Amory L. Haskell, opened in June with 67 children, and cared for 217 all told; this is 114 more children than were accommodated during the year 1929. The annual benefit for the Summer Hospital in the form of an entertainment comprising a dinner, dancing, and cabaret, cleared the large sum of \$11,848.82.

THE BABIES HOSPITAL

Due to the small demand for private rooms, owing to the financial depression, Miss Kaltenbach has turned the eleventh floor into nurses' rooms, thus saving the Hospital \$2,500 a year, which amount had to be given to the nurses to pay their rent outside.

The splendid report made by the State of New York Department of Social Welfare, after a thorough inspection of the Hospital, was most gratifying.

In the past year the Hospital has been taxed to the utmost in the free treatment of patients, due to the serious unemployment situation, but, as usual, it has met its obligation to the community and provided the highest standard of service.

Respectfully submitted,

BETTY TUCKERMAN,
Secretary.

B. OGDEN CHISHOLM	1925-

THE BABIES HOSPITAL

ANNUAL REPORT OF THE ADMITTING OFFICE, 1930

Patients remaining January 1, 1930	104
Patients admitted from January 1, 1930 to January 1, 1931	2,320
Total	2,424
Total treated in wards	1,969
Patients admitted to private and semi-private rooms	351
Total	2,320

Age of Patients Admitted

Under one month	88
Between one and six months	354
Between six and twelve months	273
Between one and two years	313
Between two and five years	573
Over five years	719
Total	2,320

Discharged During the Year

Cured	278
Improved	1,334
Unimproved	402
Transferred to other institutions	37
Died	274
Total	2,325

Remaining January 1, 1931

Males	51
Females	48
Total remaining	99
	2,424

THE BABIES HOSPITAL

Average daily number of patients during the year	108.2
Average stay of each child in days	16.3
Paying patients	1,498
Beneficiaries	827
Total	<hr/> 2,325
Number of days paying patients	22,801
Number of days beneficiaries	16,680
Total number of Hospital days' treatment	<hr/> 39,481
Total number X-Ray examinations	3,495

Respectfully submitted,

EVELYNE M. SPOKES,
Registrar.

THE BABIES HOSPITAL

TABLE OF DISEASES TREATED

ALIMENTARY SYSTEM

INTESTINES

	Improved	Unimproved	Died	Operated	Total
Intestinal colic.	1	1
Acute colitis.	2	2	2
Chronic colitis.	2	1	3
Constipation.	10	1	..	1	11
Infantile diarrhea.	4	..	2	2	6
Dilatation and hypertrophy of colon.	1	1
Acute enteritis.	1	1
Enterocolitis.	1	..	1	..	2
Gastroenteritis.	45	4	13	10	62
Acute ileus.	2	..	2	3	4
Chronic ileus.	1	1	1
Acute gastric indigestion.	7	1	5	1	13
Acute intestinal indigestion.	7	7
Acute intestinal intoxication.	11	..	25	9	36
Chronic intestinal intoxication.	13	..	1	2	14
Intussusception.	6	5	6
Prolapse of sigmoid through rectum.	1	1
Ulcer of duodenum.	1	1	2
Volvulus of small intestine.	1	1	1
Diastasis of recti abdominus muscles.	1	1
Congenital inguinal hernia, reducible.	1	1	1
Right congenital inguinal hernia, reducible.	6	1	..	6	7
Right congenital inguinal hernia, irreducible.	2	1	..	2	3
Left congenital inguinal hernia, reducible.	2	..	1	2	3
Left congenital inguinal hernia, irreducible, strangulated.	1	1	1
Right and left congenital inguinal hernia, reducible. .	1	1	1

THE BABIES HOSPITAL

ALIMENTARY SYSTEM—*Continued*

	Improved	Unimproved	Died	Operated	Total
Right and left congenital inguinal hernia, reducible, recurrent	1	1	1
Right indirect inguinal hernia, reducible	16	3	..	12	19
Right indirect inguinal hernia, irreducible	1	1	1
Left indirect inguinal hernia, reducible	4	2	..	5	6
Right and left indirect inguinal hernia, reducible . . .	2	2	..	2	4
Internal hernia, reducible	1	1	1
Left internal hernia, irreducible	1	1
Congenital umbilical hernia, reducible	3	3	..	3	6
Congenital umbilical hernia, reducible, recurrent	1	1
Congenital hernia, into umbilical cord	2	2	2
Umbilical hernia, reducible	4	2	..	4	6
Umbilical hernia, reducible, recurrent	2	..	2
Median ventral hernia, reducible	1	1	1

LIVER AND BILE PASSAGES

Biliary cirrhosis	1	..	1	1
Fatty liver	1	1
Catarrhal jaundice	7	..	1	1	8
Stenosis of common bile duct	1	..	1	1

MUCOUS MEMBRANE OF MOUTH, TEETH AND GUMS

Acute cellulitis	1	1
Aphthous stomatitis	1	..	1
Catarrhal stomatitis	1	1
Ulcerative stomatitis	6	..	1	2	7
Agranulocytic angina	1	1	1
Macroglossia	1	1
Alveolar abscess	4	2	4
Caries of teeth	14	6	1	4	21

THE BABIES HOSPITAL

ALIMENTARY SYSTEM—*Continued*

PERITONEUM, OMENTUM AND RETROPERITONEAL TISSUE

	Improved	Unimproved	Died	Operated	Total
Peritoneal adhesions	1	1	1
Abdominal pain	2	2
Peritoneal abscess, retrocecal	1	1	1
Subsequent peritoneal abscess, pelvic	1	..	1	1
Acute local peritonitis	1	1	1
Acute diffuse peritonitis	1	..	6	2	7
Chronic peritonitis	1	1
Gonococcus acute local peritonitis	1	1

PHARYNX, TONSILS AND NASOPHARYNX

Retropharyngeal abscess	8	..	1	6	9
Peritonsillar abscess	3	1	3
Adenoids	52	3	1	49	56
Hypertrophy of tonsils	35	11	1	21	47
Acute pharyngitis	171	5	3	11	179
Chronic pharyngitis	1	3	4
Acute naso-pharyngitis	3	3
Acute follicular tonsillitis	46	2	3	6	51
Chronic tonsillitis	50	21	3	42	74

RECTUM, ANUS AND PERIRECTAL TISSUE

Fistula in ano	5	3	5
Hemorrhoids	1	1
Periproctitis, subcutaneous abscess	1	1	1
Periproctitis, ischiorectal abscess	1	1
Proctitis	1	1
Prolapse of rectum	1	1
Prolapse of rectum, incomplete	2	2	2
Stricture of rectum	1	1

THE BABIES HOSPITAL

ALIMENTARY SYSTEM—*Continued*

STOMACH

	Improved	Unimproved	Died	Operated	Total
Acute gastritis	1	1
Chronic gastritis	1	1
Cardiospasm	1	1	1
Pylorospasm	2	2
Stenosis of pylorus of stomach	1	1	1
Traumatic rupture of stomach	1	1	1
Undiagnosed condition of stomach	1	1

VERMIFORM APPENDIX

Acute appendicitis	16	..	1	14	17
Acute appendicitis with acute local peritonitis	8	8	8
Acute appendicitis with peritoneal abscess, laterocolic	5	5	5
Acute appendicitis with peritoneal abscess, mediocolic	2	2	2
Acute appendicitis with peritoneal abscess, pelvic	3	3	3
Acute appendicitis with peritoneal abscess, retrocecal	1	1	1
Acute appendicitis with acute diffuse peritonitis	8	8	8
Acute appendicitis with progressive fibrino-purulent peritonitis	1	1	1
Chronic appendicitis	6	1	1	5	8

CARDIO-VASCULAR SYSTEM

VEINS

Varicose veins of esophagus	2	2
---------------------------------------	----	---	----	----	---

HEART

Cardiac arrhythmia, auricular fibrillation	1	..	1
Cardiac arrhythmia, premature contractions, auricular	1	1

THE BABIES HOSPITAL

CARDIO-VASCULAR SYSTEM—*Continued*

	Improved	Unimproved	Died	Operated	Total
Cardiac arrhythmia, premature contractions, ventricular.	1	1
Cardiac hypertrophy.	2	1	2	..	5
Cardiac insufficiency.	1	..	4	1	5
Acute cardiac dilatation.	1	..	1
Acute rheumatic endocarditis.	1	..	1
Hemolytic staphylococcus aureus, acute endocarditis.	1	1	1
Acute myocarditis.	2	1	2
Chronic myocarditis.	2	2
Chronic cardiac valvular disease, aortic insufficiency.	3	..	5	1	8
Chronic cardiac valvular disease, mitral insufficiency.	24	19	7	5	50
Chronic cardiac valvular disease, mitral stenosis.	10	11	9	2	30
Chronic cardiac valvular disease, tricuspid insufficiency.	2	..	2
Acute fibrinous pericarditis.	2	2	2
Serofibrinous pericarditis.	3	1	5	1	9
Acute rheumatic serofibrinous pericarditis.	1	..	1

CONNECTIVE TISSUE

Abscess of parietal region.	1	1
Abscess of occipital region.	1	1	1
Abscess of axillary region.	1	1
Abscess of lateral abdominal region.	1	1	1
Abscess of gluteal region.	2	2	2
Abscess of anterior brachial region.	1	..	1	2	2
Abscess of lateral brachial region.	1	1	1
Abscess of posterior brachial region.	1	1	1
Abscess of trochanteric region.	1	..	1	1	2
Abscess of lateral femoral region.	1	1	1
Abscess of anterior region of knee.	1	1	1

THE BABIES HOSPITAL

CONNECTIVE TISSUE—*Continued*

	Improved	Unimproved	Died	Operated	Total
Abscess of medial crural region	1	1
Abscess of calcaneal region	1	1	1
Cellulitis of upper eyelid	1	1
Cellulitis of lower eyelid	1	1
Cellulitis of buccal region	1	1
Cellulitis of dorsal region of hand	1	1
Cellulitis of volar region of hand	1	1
Cellulitis of volar surface of finger	2	2
Cellulitis of trochanteric region	1	1
Cellulitis of patellar region	1	1
Cellulitis of anterior region of knee	1	1	1
Cellulitis of dorsum of foot	1	1
Cellulitis of sole of foot	1	1	1
Hemolytic staphylococcus aureus, cellulitis of occipital region	1	..	1
General edema	1	1	..	2
Granulation tissue	1	1

DUCTLESS GLANDS

Dyspituitarism	1	1
Hypopituitarism, infantile Fröhlich	1	1
Pluriglandular syndrome	1	1
Hyperthyroidism	2	2
Hypothyroidism	3	3
Infantile myxedema	1	2	..	1	3
Hyperplasia of thymus gland	1	2	3

HEMATOPOIETIC SYSTEM

BLOOD

Erythroblastic anemia	1	1
Secondary anemia	37	4	4	15	45

THE BABIES HOSPITAL

HEMATOPOIETIC SYSTEM—*Continued*

	Improved	Unimproved	Died	Operated	Total
Sickle cell anemia	1	1	2
Hemophilia	3	3
Paroxysmal hemoglobinuria	1	1
Hemorrhagic disease of the new-born	2	2	2
Hemorrhage diathesis, type undetermined	1	1
Purpura, symptomatic	3	2	3
Purpura, hemorrhagic	3	1	2	3	6
Infantile scorbutus	7	7
Acute lymphocytic leukemia	1	..	3	2	4
Acute myeloblastic leukemia	1	..	1
Acute myelogenous leukemia	1	1
Undiagnosed condition of blood	1	1
Aplasia of bone marrow	2	2	2

LYMPH GLANDS, LYMPHATIC VESSELS AND LYMPHOID TISSUE

Abscess of parotid lymph glands	1	1	1
Abscess of superficial cervical lymph glands	1	1	1
Abscess of upper deep cervical lymph glands	1	1	1
Hemolytic streptococcus abscess of inguinal lymph glands	1	1	1
Acute occipital lymphadenitis	2	1	2
Acute posterior auricular lymphadenitis	3	2	3
Acute anterior auricular lymphadenitis	3	1	3
Acute submaxillary lymphadenitis	9	4	9
Acute superficial cervical lymphadenitis	33	5	..	14	38
Acute upper deep cervical lymphadenitis	22	..	1	8	23
Acute lower deep cervical lymphadenitis	5	..	1	4	6
Acute axillary lymphadenitis	1	1
Acute tracheal lymphadenitis	2	2	2
Acute mesenteric lymphadenitis	13	6	13

THE BABIES HOSPITAL

HEMATOPOIETIC SYSTEM—*Continued*

	Improved	Unimproved	Died	Operated	Total
Acute inguinal lymphadenitis	3	2	3
Acute retroperitoneal lymphadenitis	1	1
Chronic submaxillary lymphadenitis	1	1
Chronic superficial cervical lymphadenitis	5	3	5
Chronic upper deep cervical lymphadenitis	5	2	5
Chronic lower deep cervical lymphadenitis	3	1	3
Chronic lingual lymphadenitis	1	1
Chronic tracheal lymphadenitis	1	1	1
Chronic bronchial lymphadenitis	1	1	1
Chronic mesenteric lymphadenitis	1	1
Chronic submental lymphadenitis	1	1
Chronic inguinal lymphadenitis	1	1
Status thymo lymphaticus	3	..	3

SPLEEN

Splenic anemia	3	6	..	3	9
Splenomegaly of unknown origin	1	1
Acquired hemolytic jaundice	2	2

MUSCULAR SYSTEM

Acute bursitis of prepatellar bursa	1	1	1
Acute bursitis of suprapatellar bursa	1	1	1
Muscular dystrophy	1	1
Progressive muscular dystrophy	3	3
Hemorrhage into sternocleido mastoid muscle	1	1

NERVOUS SYSTEM

BRAIN AND CEREBRAL MENINGES

Chorea, Sydenham's	6	1	..	1	7
Concussion of brain	10	1	10
Acute inferior polioencephalitis	1	1

THE BABIES HOSPITAL

NERVOUS SYSTEM—*Continued*

	Improved	Unimproved	Died	Operated	Total
Acute superior poliоencephalitis	2	1	1	..	4
Encephalitis lethargica	3	..	1	1	4
Idiopathic epilepsy	5	40	45
Jacksonian epilepsy	3	3
Secondary epilepsy	4	8	12
Hemorrhage into cerebrum	1	1
Hemorrhage into pons	1	..	1
Subdural hemorrhage	1	3	1	4
Subpial hemorrhage	1	..	1
Hydrocephalus	1	1
Acquired hydrocephalus	5	1	2	6
Acquired hydrocephalus, obstruction at subarachnoid cisternae	1	1	1	2
Suppurative cerebral leptomeningitis	7	1	7
Serous cerebral leptomeningitis	2	1	2
Influenza bacillus, suppurative cerebral leptomen- ingitis	1	..	1
Pneumococcus suppurative cerebral leptomeningitis External hemorrhagic pachymeningitis	3	1	3
Optic atrophy	1	3	4
Diplegia	1	1	2
Malgenesis of brain	2	1	1	3
Paralysis, bulbar	1	1
Paraplegia	1	1
Tetraplegia	1	1
Tumor of brain	1	1
Undiagnosed condition of cerebrum	9	1	..	10
Undiagnosed condition of brain	1	1	..	2
Undiagnosed condition of central nervous system	3	3
	2	3	5

THE BABIES HOSPITAL

NERVOUS SYSTEM—*Continued*

DISEASES OF THE MIND

	Improved	Unimproved	Died	Operated	Total
Idiocy	20	2	..	22
Imbecility	3	3
Constitutional inferiority	1	16	..	2	17
Moron	4	4
Constitutional psychopathy	1	1

NERVES

Paralysis of brachial plexus	1	1
Paralysis of 7th cranial nerve	3	1	4
Paralysis of musculo-spiral nerve	1	1	1
Paralysis of radial nerve	1	1	1

NERVOUS DISEASES OF UNKNOWN ORIGIN

Angioneurotic edema	1	1
Athetosis	1	1
Chorea	13	3	16
Infantile convulsions	4	4	1	..	9
Diabetes insipidus	1	1	2
Migraine	1	1
Habit spasm	1	1
Speech defect	1	1
Tic of pharyngeal muscle	1	1
Hyperidrosis	1	1
Phobic neurosis	1	1	2
Neurosis of hypochondrium	1	1
Neuropathic child	1	3	4

THE BABIES HOSPITAL

NERVOUS SYSTEM—*Continued*

NERVOUS DISEASES OF FAMILIAL AND HEREDITARY ORIGIN

	Improved	Unimproved	Died	Operated	Total
Congenital amyotonia (Oppenheim's Disease).....	1	..	1
Myopathic amyotrophy, infantile form of Landouzy-dejerine.....	..	1	1
Myopathic amyotrophy: pseudo-hypertrophic form of Duchenne.....	..	1	1
Amaurotic family idiocy.....	..	2	2
Congenital myotonia.....	..	1	1

SPINAL CORD AND SPINAL MENINGES

Suppurative spinal leptomeningitis.....	8	1	8
Influenza bacillus, suppurative spinal leptomeningitis.....	1	..	1
Pneumococcus suppurative spinal leptomeningitis.....	3	1	3
Hemolytic streptococcus spinal leptomeningitis.....	1	..	1
Hydromyelia.....	..	1	1
Infantile spastic spinal paralysis.....	2	2	..	1	4
Spinal paraplegia.....	..	1	1
Acute anterior poliomyelitis.....	..	1	1
Late complication following acute anterior poliomyelitis, paralysis of muscles of leg.....	..	1	1
Late complication following acute anterior poliomyelitis, paralysis of extensor muscles of fingers.....	..	1	1
Late complications following acute anterior poliomyelitis, paralysis of extensor muscles of wrist.....	..	1	1
Late complication following acute anterior poliomyelitis, paralysis of extensor muscles of ankle.....	..	1	1
Late complication following acute anterior poliomyelitis, paralysis of flexor muscles of ankle.....	..	1	1
Late complication following acute anterior poliomyelitis, paralysis of extensor muscles of toe.....	..	1	1

THE BABIES HOSPITAL

NERVOUS SYSTEM—*Continued*

	Improved	Unimproved	Died	Operated	Total
Late complication following acute anterior poliomyelitis, paralysis of flexor muscles of toes	1	1
Traumatic lesion of spinal cord, incomplete transverse	1	1

OSSEOUS SYSTEM

BONES AND CARTILAGES

Chondrodystrophia foetalis	1	1
Cyst of upper extremity of femur	1	..	1	1
Osteogenesis imperfecta	2	2
Kohler's disease	1	1
Acute suppurative osteomyelitis of skull	1	1
Acute suppurative osteomyelitis of sternum	1	1
Acute suppurative osteomyelitis of proximal phalanx of middle finger	1	1	1
Acute suppurative osteomyelitis of middle phalanx of middle finger	1	1	1
Acute suppurative osteomyelitis of inner third of clavicle	1	1	1
Acute suppurative osteomyelitis of shaft of humerus, upper third	1	1	1
Acute suppurative osteomyelitis of upper extremity of femur	3	2	3
Acute suppurative osteomyelitis of shaft of femur . .	1	1
Acute suppurative osteomyelitis of shaft of femur, upper third	1	1	1
Acute suppurative osteomyelitis of upper extremity of tibia	2	2	2
Acute suppurative osteomyelitis of shaft of tibia . . .	1	1	1
Acute suppurative osteomyelitis of shaft of tibia, middle third	1	1	1

THE BABIES HOSPITAL

OSSEOUS SYSTEM—*Continued*

	Improved	Unimproved	Died	Operated	Total
Acute suppurative osteomyelitis of lower extremity of tibia	1	1	1
Acute suppurative osteomyelitis of lower extremity of fibula	1	1
Acute suppurative osteomyelitis of 5th metatarsal	1	1	1
Chronic suppurative osteomyelitis of mandible	2	2	2
Chronic suppurative osteomyelitis of mandible, alveolar process	1	1
Chronic suppurative osteomyelitis of 4th rib	1	1	1
Chronic suppurative osteomyelitis of 5th rib	1	1	1
Chronic suppurative osteomyelitis of 7th rib	2	1	2
Chronic suppurative osteomyelitis of 8th rib	1	1
Chronic suppurative osteomyelitis of 4th metacarpal	1	1	1
Chronic suppurative osteomyelitis of proximal phalanx of thumb	1	1	1
Chronic suppurative osteomyelitis of shaft of fibula .	3	3	3
Perthe's disease	1	1
Undiagnosed condition of bones	1	1	2

JOINTS

Acute arthritis of shoulder joint	1	1	1
Acute arthritis of hip joint	1	1
Acute arthritis of knee joint	2	2	2
Gonococcus acute arthritis of elbow joint	1	1
Influenza bacillus acute arthritis of elbow joint	1	..	1
Chronic arthritis of hip joint	2	1	2
Chronic arthritis of knee joint	1	1
Arthritis deformans	1	1
Acute multiple arthritis	1	1	1
Chronic multiple arthritis	1	1

THE BABIES HOSPITAL

OSSEOUS SYSTEM—*Continued*

	Improved	Unimproved	Died	Operated	Total
Suppurative arthritis of shoulder joint	3	3	3
Suppurative arthritis of hip joint	4	4	4
Suppurative arthritis of wrist joint	1	1	1
Suppurative arthritis of knee joint	2	2	2
Suppurative arthritis of ankle joint	1	1	1
Chronic serous synovitis of knee joint	1	1

REPRODUCTIVE SYSTEM

FEMALE

Cyst of ovary	1	1	1
Torsion of ovary	1	1	1
Acute salpingitis	1	1	1
Gonococcus acute salpingitis	1	1
Torsion of uterine tube	1	1	1
Atelectasis	1	1	1	..	3
Acute vaginitis	2	2
Chronic vaginitis	1	1
Gonococcus acute vaginitis	1	3	4
Valvular obstruction of posterior urethra	1	..	1	1

MALE

Calculus in male urethra	1	1
Recto-urethral fistula	1	1
Spasmodic stricture of male urethra	1	1	1
Acute urethritis of male urethra	1	1
Chronic urethritis of male urethra	1	1
Preputial adhesions	1	1
Balanoposthitis	3	1	3
Phimosis	4	6	..	1	10
Redundant prepuce	1	1	..	1	2

THE BABIES HOSPITAL

REPORT OF THE OUT-PATIENT DEPARTMENT, 1930

It is now two and a half years since this Department took over the pediatric work of the Vanderbilt Clinic. Whatever difficulties the initial period of organization presented have been left well behind, and it were well that we review the past, take stock of the present and plan the future. The period of ploughing and planting is past. Now is the time of intensive cultivation; the fruits will be for those who follow. The general policy enunciated last year of having all special clinics and groups segregated during the morning hours and reserving the afternoons for the general medical and surgical clinics has been rigidly adhered to. This arrangement has harmonized with the policy of the Vanderbilt Clinic as a whole. In passing, note should be made of the fact that our relations with the administration and with the other departments of Vanderbilt Clinic have been particularly happy. Coöperation and teamwork have notably improved. This has been chiefly due to increased familiarity with the staffs of the various departments and a better acquaintance with the problems that confront the clinic as a whole.

Attendance.—The attendance at the clinic as compared with that of last year presents some interesting figures. There were treated at the clinic during the year 6,531 new patients, an increase of 871 over the year previous. The total visits of patients, exclusive of new children, numbered 31,492, an increase of 5,742 over 1929. This gives a grand total for the year of 38,023 visits. An average of one hundred patients was seen every afternoon and a daily average of fifty was cared for each morning. These figures would tend to show a steady and normal growth. The first rush of patients to the new and well-advertised center had been fairly well dissipated by the beginning of 1930. The congestion of traffic in the clinic during the peak-load hours, which was one of our chief difficulties during the early months, has practically disappeared. Thus danger of contact infections among the children has been materially decreased. This improvement may be as-

THE BABIES HOSPITAL

cribed chiefly to three factors, namely better admitting service which is now done by interns, smoother and speedier management of patients by the clerical and nursing aids and, lastly, improved handling of the records. The work of the central record room as it applies to this clinic deserves commendation.

General Clinic.—Concerning the progress of the general clinic, several points should be remarked. The presence of one of the attending physicians of the Hospital in the clinic each afternoon has served to improve the medical service rendered and, what is equally important, has been a stimulus and a help to the work of the regular clinic physicians. For this we are grateful. The work of the nutritionist appointed in May has more than doubled and has been of very distinct advantage to the clinic. Cognizance should be taken of the services rendered by Miss Palmer in the luetic clinic. The close and efficient coöperation of the Departments of Pathology, Basal Metabolism, Chemistry and X-Ray has made really good medical practice possible in the Out-Patient Department. One other noteworthy feature of the past year has been the regular teaching of third- and fourth-year medical students. Throughout the school year there have been assigned to regular daily duty one or two fourth-year students who have worked as regular clinic physicians under the supervision of the chief of clinic. In addition, four afternoons a week a group of eight third-year students has received instruction from various members of the staff, working in rotation. This arrangement has afforded the students varied types of instruction by different teachers and has utilized more men for teaching without weakening the staff for its routine work. We feel that having more of the clinic staff participate in clinical teaching benefits the individual physician and improves the morale of the staff. If feasible, this practice should be continued.

Special Clinics.—Certain changes which have occurred in the special clinics should be noted. The clinic for the treatment of congenital syphilis was discontinued July 1st and cases under its care were transferred to the

THE BABIES HOSPITAL

Department of Dermatology and Syphilis of Vanderbilt Clinic. This arrangement was the result of an agreement between the Babies Hospital, Sloan Hospital and the Department of Dermatology. The clinic for the treatment of gonorrheal vaginitis was discontinued May 1st, the patients being referred to a similar clinic at Bellevue Hospital. The posture, massage and heliotherapy clinic has continued to carry its extremely heavy load, a total of over 10,000 visits for the year. A portable diathermy machine, which has been added to the equipment, should increase materially the scope of the work done. Dr. Davidson and Dr. Merritt have continued their studies of premature babies born in Sloan Hospital and of well children born as the result of abnormal or unusual labors. The study of the pyurias and enuresis has continued in the clinic for that purpose. A developmental clinic was inaugurated August 1st, and on October 1st a clinic for the follow-up and study of the secondary anemias of children was begun under the direction of Dr. Wollstein and Dr. Wilke, with the aid of Miss Kreidel of the Hospital Laboratory Staff. Diabetic children, both in the hospital and in the out-patient service have been under the care of Dr. Brush. The allergic group of children which, as noted last year, was under Dr. Bergstrom's care in that department of Vanderbilt Clinic, has been transferred to our own floor in order to afford closer contact with the indoor service. Dr. Metcalf's work in epilepsy, growing steadily in volume, maintains the high standard set at its initiation. Under Drs. Langman and Smith the cardiac clinic has continued its work in conjunction with the New York Tuberculosis and Heart Associations. Dr. Lyttle has conducted his clinic as an integral part of his hospital research in nephritis.

Social Service.—A very special mention should be made of the work of the Social Service Department. The increased case load, the increased staff and the increased varieties of work done, particularly in the special clinics, have entailed much more close follow-up care. This has added infinitely

THE BABIES HOSPITAL

to the value of the clinic as a whole, thanks to the splendid coöperation of Miss Stilwell and her associates.

Recommendations.—Inasmuch as this is the last annual report of the present chief of clinic, it would seem pertinent that he present certain problems and certain suggestions as a result of the experience of two and a half years of organization and development. During this period, “in the full tide of successful experiment,” this Department has become probably the largest and certainly the most comprehensive pediatric out-patient service in this city. We must beware, however, of that greatest of faults which Carlyle says is to be conscious of none.

(1) It has become increasingly apparent that the chief of clinic should be a so-called full-time man, with no outside medical responsibilities. The dispensary is now running all day every clinic day, either for special groups or for the general clinic. With this expansion of activities, the administrative work has increased, and the need for one man who will administer and supervise the work both morning and afternoon is urgent. The quality of the medical work must be kept at a high level. Any falling off means wasted effort and wasted money. Proper surveillance and supervision of this clinic constitutes an all-day job. Most of the subsequent suggestions are contingent on this first one.

(2) A more concentrated and sustained effort should be made to teach and improve the pediatric practice of the individual physicians of the staff, many of whom are doing general practice throughout the city. This would make the clinic of greater value to the men and indirectly reflect greater credit on the Babies Hospital.

(3) Although more than eleven thousand different children have been observed, studied and treated during the past two and a half years, not one contribution to medical literature has been made from this clinic. This fact demands attention and remedy. The period of initial organization is past. That organization must now justify itself.

THE BABIES HOSPITAL

(4) A careful review or survey of all the clinics should be made. This applies particularly to the morning sessions. The multiplicity of special clinics or groups suggests that possibly the number of these should be decreased. The time has come to determine whether all these clinics can justify their existence. Without detracting in any way from the splendid work of the posture and massage clinic, a licensed physician should be assigned the responsibility for this clinic. Hitherto this has not been the case. As John Morley says, "It is not enough to do good; one must do it the right way." From the hospital point of view, greater emphasis should be placed on the general afternoon clinic.

(5) A financial survey should be made to determine the actual income from the general clinic and from each of the special clinics, together with the costs of each of these clinics individually and as a whole. The possibility of omitting certain clinics and grouping others might suggest means for decreasing running expenses and making the clinic more nearly self-supporting. Any such study may only be based on figures which are accurate, truthful and valid, and is only valuable in the hands of a man who is fully cognizant of the day-to-day and hour-to-hour life of the clinic.

(6) The so-called vaginitis clinic should be revived, as there is a distinct need for this work which cannot be carried on in a general clinic.

(7) The problem of a reasonably priced diagnostic service for the benefit of physicians who are not connected with the Hospital is one which merits careful consideration. The possibilities of such a service, economically run, as a boon to the community, particularly the so-called white-collar class, are manifold.

(8) It may seem imprudent at this time, but thought should be given to the possibility of some day replanning and remodelling the clinic floor. It is poorly adapted to its purpose. Space cannot be allowed here for its discussion, but it is a suggestion worthy of very careful consideration.

Any report of this clinic would be incomplete if it failed to mention the energy, ability and devotion of Miss Mattice, the head nurse. She has

THE BABIES HOSPITAL

worked days and planned nights to make the clinic a successful and serviceable institution. The outgoing chief of clinic wishes at this time to express his gratitude to his staff of whom during these past two and a half years there have been more than forty physicians. Their enthusiasm, loyalty and skill have made the success of this work possible. And last sincerely grateful acknowledgment is made to Dr. Wilcox for his sympathetic counsel and his constant support.

Respectfully submitted,

HOWARD REID CRAIG,
Chief of Clinic.

THE BABIES HOSPITAL

ANNUAL REPORT OF THE SOCIAL SERVICE DEPARTMENT

JANUARY 1, 1930 TO JANUARY 1, 1931

During the past year, if one can judge from figures, more demands have been made upon the Social Service Department than ever before. We have done more work and, consequently, in reaching additional families it has been necessary to spend more money.

An increase of approximately five hundred and fifty home visits have been made. Nearly one hundred of these were medical follow-up visits and were made by volunteer workers. At different times during the year visiting has been done by Miss Elizabeth Bellah, Mrs. Henry Nelson and Mrs. T. Welpen.

Our "case load" has more than doubled, and two hundred and twenty-two more children have been sent away for convalescence than has ever before been possible. This year the number of children sent for convalescence totals four hundred and ninety-six, two hundred and seven of which went to Rumson. The cost of convalescence for the year 1930 amounts to \$889.21. Out of the two hundred and eighty-nine children who went to convalescent homes run by other agencies, all but thirty-one were accepted without financial obligation to this Department. For thirteen of these the individual families were entirely responsible, for fourteen the Social Service Committee was responsible, and for four the expenses were shared by the families and the Committee.

The supplying of milk for sick children has, as usual, played a large part in the relief given; this year \$1,039.16 has been spent for milk in comparison with \$583.44 of last year. This large increase has been necessary not only because of the additional families under our supervision, but also because of protracted unemployment.

Relief at Thanksgiving time, baskets, warm clothing and inexpensive toys at Christmas, trusses, scales for the epilepsy clinic, medicine, food, carfare and baby carriages, are some of the things made possible by our

THE BABIES HOSPITAL

generous friends, the Social Service Committee and the Board of Managers.

During this very difficult year, we have had the staunchest support from our old friends as well as from many new ones. Many gifts of money have come in which are recorded on the following pages under "Donations."

The year 1931 finds the personnel of this Department unchanged except for Miss Helen B. McElwain, who succeeds Miss Ray Breakstone, and Miss Blanche Elliott, our secretary, who follows Miss Crowell.

HELEN BARBOUR,
Chairman, Social Service Department.

THE BABIES HOSPITAL

STATISTICAL REPORT OF THE SOCIAL SERVICE DEPARTMENT

JANUARY 1, 1930 TO JANUARY 1, 1931

Case load carried from December 31, 1929	108
New cases from January, 1930, through December 31, 1930	460
{ Referred by Babies Hospital	245 }
{ Referred by Vanderbilt Clinic	215 }
Total	460
Cases reopened	177
Cases closed	524
Cases on hand January 1, 1931	221
Patients referred for minor service	1,563
Home visits made on active Social Service cases	1,718
Home visits made for medical follow-up	477
Home visits made for medical follow-up by volunteers (approximate count)	94
Total home visits	2,289
Office interviews	4,932
Clinic fee adjustments made	196
Persons provided with clothing	110
Persons helped with emergency financial relief	74
Persons referred for employment	200
Meetings attended	40
Country care provided	496
{ Rumson	207 }
{ Other convalescent homes	289 }
Total	496
Quarts of milk supplied during year	7,050½
Eggs supplied during year (dozen)	27
Coöperative agencies visited	68
Patients referred to private doctors	5
Patients referred to coöperative agencies	1,580

THE BABIES HOSPITAL

REPORT OF THE CRIBSIDE COMMITTEE

The Cribside Committee successfully carried on its work during the year of 1930.

The following donations were made to the Hospital from money raised through dues, a bridge party, the Lenten Sewing Class, profits from the Nearly New Shop and money in the treasury laid aside to meet the Committee's pledge to the Building Fund: \$600 for one half of the salary of a visiting nurse; \$500 for the support of a bed for one year; \$500 to the Social Service; \$7,450 payment made to the Building Fund.

The Committee wishes especially to express its thanks to Mr. W. Henry Williams for his donation of the use of the Plaza Ball Room which enabled them to hold a successful bridge party, netting \$1,048.01; to the Hostesses who entertained the Lenten Sewing Class; to the Red Cross for cutting out all the garments made at the Lenten meetings; to the many friends who sent donations to the Nearly New Shop.

The Thursday Morning Lenten Sewing Class was held as usual in houses loaned for the purpose; nearly a thousand garments were made. The Committee maintained its membership in the Nearly New Shop and in the Needlework Guild of America.

The Committee will feel greatly the loss of Mrs. H. Rawlins Baker, who died in September, 1930, and had served faithfully and helpfully as an active member for many years.

MARGARET I. CHISHOLM,
Secretary.

THE BABIES HOSPITAL

ANNUAL REPORT OF THE SUMMER BRANCH OF THE BABIES HOSPITAL

The Summer Branch of the New York Babies Hospital at Rumson, New Jersey, opened on June 5, 1930, with Miss Wood as superintendent, Miss Kibell, assistant superintendent, and Dr. Horaschak, resident physician. Dr. William J. Mersereau, as in former years, gave generously of his time and advice as consulting physician.

The Hospital opened with sixty-seven children and cared for two hundred and seventeen all told during the three months it remained open. That is one hundred and fourteen more children than were accommodated during the year 1929.

All of the children were kept for three weeks, and those few who seemed to need a lengthier stay in the country were allowed to remain as long as the doctors felt necessary.

An epidemic of measles broke out during the early part of the summer, which caused some anxiety, but, by taking extreme precautions, the disease was confined to the group of children then in residence and the succeeding group of children did not contract it.

Despite this set-back, practically all of the children in the group affected were returned to New York, having gained weight and in a much improved physical condition.

Unfortunately, when the season was nearly over, Dr. Horaschak tendered her resignation. However, through the prompt action of Dr. Hedges, the Hospital was fortunate in securing the services of Dr. Blevins, who showed great interest in the work being carried on and helped bring our season to a successful close.

On July 25th was held our annual benefit in the form of an entertainment comprising dinner, dancing and cabaret.

By selling the tables at a substantial profit per cover, by auctioning off dresses during a fashion show, and through various other money-raising schemes, the very creditable sum of \$11,848.82 was cleared.

THE BABIES HOSPITAL

With this substantial amount in the bank, it was possible to take care of all 1930 expenses and also to provide for a number of much needed repairs and improvements for the ensuing year.

The Hospital season closed on September 2nd, with every indication that next year will see its work an even greater success than during 1930.

Respectfully submitted,

ANNETTE TILFORD HASKELL,

Chairman.

GENERAL RULES

1. The beds of the Hospital are free to the needy poor. Others are charged according to their means.
2. Sick children up to 12 years of age are admitted, excepting those suffering from contagious diseases.
3. Applications for admission should be made at the Hospital during the day, from 9 to 5, although emergency cases are received at any time.
4. The Out-Patient Department, at the Vanderbilt Clinic, of the Medical Center, is open daily throughout the year, from 2 to 3 P.M., excepting on Saturdays, Sundays and holidays.
5. Visiting day for friends of patients is Wednesday, from 2 to 4 P.M.
6. Visitors to the Hospital are welcome any afternoon, between 3 and 5.

TO THE BOARD OF DIRECTORS:

Gentlemen:

I have the honor to present the forty-second annual report of the School of Nursing of The Babies Hospital.

During the year of 1930 we have increased the number of affiliations for the course in Pediatrics to six. The following schools of nursing are represented:

1. St. Luke's Hospital, Newburgh, New York
2. House of Mercy Hospital, Pittsfield, Massachusetts
3. Presbyterian Hospital, New York, New York
4. House of the Good Samaritan, Watertown, New York
5. Vassar Brothers' Hospital, Poughkeepsie, New York
6. St. Luke's Hospital, Bluefield, West Virginia

There is a constant effort being made to improve the technique and type of nursing education offered to the student nurses. We are deeply indebted to our assistants in the graduate nursing staff and to the attending and house medical and surgical staff for their coöperation.

The present staff consists of:

Director.....	1
Secretary to Director.....	1
Assistant Director.....	1
Educational Director, Instructor and Teaching Supervisor.....	1
Instructor of Infants' Nurses and Teaching Supervisor.....	1

THE BABIES HOSPITAL

Night Director.....	1
Graduate Night Float.....	1
Operating Supervisor.....	1
Assistant Operating Room Supervisor.....	1
Admitting Room Supervisor.....	1
Head Nurses.....	6
Assistant Head Nurses.....	4
General Floor Nurses.....	5

Infants' Nurses.....	26

We are indebted to friends of The Babies Hospital for many gifts of tickets for operas and concerts and frequent contributions of current magazines. We are also indebted to Mrs. Oliver G. Jennings for her gifts to the infants' nurses at Christmas, and to Dr. Stafford McLean for his gift of a very fine radio to the infants' nurses.

Christmas was a particularly happy time for the children. We received generous donations of toys, new sweaters and gifts of money for the trees and various Christmas decorations. The nurses and doctors enjoyed the special Christmas dinner and boxes of candy.

From several aspects our most outstanding gift during 1930 was a fund which is to take care of the salary of an "Educational Therapy Worker" for three years. It is impossible to evaluate the happiness this work has given to the children.

Miss Geraldine McAlpin, "the teacher," is well equipped, because of education and personality, to entertain and teach the convalescent child. She has been very helpful in her suggestions and in handling behavior

THE BABIES HOSPITAL

problem children. She is a definite addition to the teaching staff with her lectures on "The Normal Child" to both the affiliating students and infants' nurses.

We also appreciate the work of several volunteers who, under Miss McAlpin's direction, read to children or entertained with games and handicraft of various kinds. As "Happiness and Contentment are important factors in a child's recovery," we feel grateful for the gift of this Department.

We have had approximately four hundred and six written applications and one hundred and seventy-five personal applications for our Course for Infants' Nurses. The Babies Hospital Registry has placed fifty graduate infants' nurses in homes during the year.

The following sixteen infants' nurses completed their course of training during 1930:

MARION BARR
ELIZABETH COGGINS
AGNES DAVISON
CATHERINE DUGGAN
RAY FOSTER
AUGUSTA LECHLEDER
BRIDIE MCCORMICK
MOLLIE MULLIGAN

HANNA NIELSEN
MARY OLIVER
MAY O'CALLAGHAN
NORA O'RIORDAN
NANNA PETERSON
THELMA TAYLOR
LOUISE TURON
ELIZABETH WILLEN

WINIFRED KALTENBACH,
Director of Nurses.

THE BABIES HOSPITAL

To the Board of Directors,
The Babies Hospital of the City of New York,
New York, N. Y.

We have audited the books and records of The Babies Hospital of the City of New York for the year ended December 31, 1930, and certify that, in our opinion, the accompanying statement of assets, liabilities and funds sets forth fairly the financial condition of The Babies Hospital of the City of New York at December 31, 1930, and the statements of income and expense of the Current Fund and the Summer Branch at Rumson, New Jersey, correctly state the result of operations for the year ended at that date.

HURDMAN AND CRANSTOUN.

April 29, 1931.

This statement does not include any liability for the rent of the Out-Patient Department.

We have audited the accounts of the Summer Branch of The Babies Hospital of the City of New York for the year ended December 31, 1930, and have found that the receipts, as recorded above, have been properly accounted for.

April 14, 1931.

HURDMAN & CRANSTOWN.

THE BABIES HOSPITAL

BUILDING FUND

THE BABIES HOSPITAL OF THE CITY OF NEW YORK

JULY 1, 1926 TO FEBRUARY 28, 1931

Board of Directors, The Babies Hospital of the City of New York:

GENTLEMEN:

We have completed an audit of the disbursements made by Mr. Francis Louis Slade as Treasurer of the Building Fund of The Babies Hospital of the City of New York for the period from July 1, 1926 to February 28, 1931.

During this period there was expended an aggregate amount of	\$1,820,166.43
and the balance in bank at February 28, 1931, was	14,917.14
making total receipts of	<u>\$1,835,083.57</u>

This amount was provided from the following sources:

Contributions	\$1,711,740.08
Interest on Bank Balances	30,343.49
Advance from Permanent Fund of the Hospital	93,000.00
	<u>\$1,835,083.57</u>

As a result of our audit it was found that all expenditures were duly authorized by the Building Committee and were supported by proper vouchers. A review of the canceled checks disclosed that they were in agreement with the check book and with the statements submitted periodically by the bank. The balance in bank was confirmed to us by the depository.

We examined a list of contributors indicating total pledges of	\$1,534,155.36
Of this amount there was collected	1,511,740.08
leaving a balance to be collected as of February 28, 1931, of	<u>\$22,415.28</u>

THE BABIES HOSPITAL

In addition to the moneys which were received and disbursed by the Treasurer, a contribution of \$200,000 was made direct to the Presbyterian Hospital, which amount has been included in the accompanying statement as a receipt and payment on account of Hospital contract.

It will be noted that of the total contributions of	\$1,711,740.08
there was paid to Messrs. Tamblyn and Brown, as campaign managers, by authority of the Board of Directors, the sum of	58,573.65
representing their fee of \$35,000 and expenses of \$23,573.65, leaving a balance available to meet construction and equipment costs and expenses in connection therewith, of	\$1,653,166.43
to which should be added interest earned of	30,343.49

making the total funds available as a result of the campaign	\$1,683,509.92
--	----------------

The total expenditures for construction and equipment costs and expenses amounted to	1,761,592.78
--	--------------

resulting in a deficit of	\$78,082.86
-------------------------------------	-------------

There was transferred from the Permanent Fund of the Hospital, by authority of the Board of Directors, the amount of	93,000.00
--	-----------

leaving a balance in bank at February 28, 1931, of	\$14,917.14
--	-------------

THE BABIES HOSPITAL

CRIBS FURNISHED

Twenty-five dollars will furnish a crib for one year

Two furnished in perpetuity by gift in May, 1917, of \$1,000 under the will of Mary Isabel Reese, widow of Brigadier-General Chauncy B. Reese, in memory of her only grandchildren, the little daughters of John and Sarah Brewerton Reese Jolly:

Sarah Brewerton Jolly, born Dec. 19, 1905; died Aug. 18, 1910.

Mary Courtenay Jolly, born Dec. 25, 1907; died March 25, 1914.

One by Mrs. Eben E. Olcott, the "Erskine Crib."

One by Mrs. Swen A. Swenson, "In memory of Mary Margreta."

One by Mrs. William T. Schley.

Two in the name of "Ethelwyn Fox Morrison."

One by Mrs. Edward A. Le Roy, the "Louisa Crib," in memory of her mother.

Three by Mrs. Louis W. Dommerich.

One—Anonymous.

One by Mrs. John B. Calvert, in the name of "Mary Dake Mairs."

One by Miss Mildred Sawyer, the "Eleanor Crib."

One by Miss Wynfred Fox, "The Jane Alfring Crib."

THE BABIES HOSPITAL

THE CHILDREN'S CHARITY

The Children's Charity is made up of those children who are interested in the work of the Hospital, and want to help it along.

The subscription is One Dollar a year.

Sustaining Memberships, \$5.

Life Memberships, \$20.

A Membership card is sent each year when the dues are received, and every member's name is published in the Year Book of the Hospital.

Five Kinds of People Who Join the Children's Charity

- I. Big boys and girls, who want to help the sick babies.
- II. Children who have come safely through an illness—to show their thankfulness.
- III. Brand new babies—to celebrate their arrival.
- IV. Grown-ups in the name of some child they love, or the child they once were themselves.
- V. In memory of children who have died—to do the good they were not spared to do.

Send your dues, with name and address to

MRS. BREWSTER JENNINGS,
Glen Head, Long Island,
New York.

Make checks payable to THE BABIES HOSPITAL.
